ONDO PROVINCE MEMORANDUM FOLLOWING

OGUNLADE FOR EKITI AC

SPEC

112 OCT 1960

C/o R.A. Ogunlade,
Christ's School,
Ado-Ekiti.

23/9/60.

To: The Premier and Executive Council,
C/o The Secretary to the Premier & Executive Council,
Western Region,
Ibadan.

Dear Sir,

MEMORANDUM ON THE SITING OF THE PROPOSED WESTERN
NIGERIAN UNIVERSITY: FROM ONDO PROVINCE.

We the undersigned, on behalf of the leaders and the people of Ondo province do humbly and sincerely wish to make our views known to the Government on the siting of the proposed Western Nigerian University.

Without any ulterior or selfish motives, we strongly feel that the best site for a University intended to serve Western Nigeria should be somewhere in Ondo Province for the following reasons :

1. Ondo province is situated in a central position in the Western region and forms a natural bridge between the Yoruba West and the non-Yoruba Mid-West. In fact, its population is an amalgam of both elements.
2. Ondo province is one of the largest provinces in the Western Region, with unrivalled availability of suitable land for the purposes of a University and its attendant requirements, with a readily accessible port at Agbabu, thus ensuring that the import of heavy equipments and materials needed for the University will not be unduly expensive and burdensome. It is also one of the three largest provincial contributors to the agricultural, financial and man-power resources of the region.
3. Of all the most important provinces in the region Ondo and the Mid-West provinces are the only ones which are not in any way affected by the distribution of already existing or proposed higher institutions - For instance the University College, the Nigerian College of Technology, the Western Nigerian Technical College are all at Ibadan whilst the already existing Seventh-Day Adventist University College is located in Ijebu province, and the proposed Baptist University is likely to be in Oyo province. All the other provinces are conveniently flanked by these institutions.
4. Ondo province is one of the least developed provinces in the region and the siting of the University there will be one of the ways by which government can really help to develop it as this will, per se, attract private and p enterprises without much additional exertion on the part of the government.
5. Ondo province is known to have given its complete unreserved and unflinching support to the government of region in the past and is still doing so now, and the siting of the University there will be an outward visible expression of the government's recognition of this, and a source of encouragement to the people for a continued future support.

*12 Soluya
Pre discuss
action to be taken
in this
13/10*

6. In our humble opinion, the only other place where the University could be appropriately sited is the Mid-West; we are however suggesting Ondo Province as a better alternative in view of its central position and other collaterals.

We do earnestly hope that this our humble opinion, sincerely expressed, will commend itself to a sympathetic and favourable consideration by the Government in its deliberation in the siting of the University.

We are,

Signatories.

1. Mr. S.O. Easn, M.A.(Lond.), Lecturer in Classics, U.C.I., Ekiti
2. Dr. S.A. Aluko, M.Sc., Ph.D. (Econ.) (Lond), Lecturer in Economics, Nigerian College, Ibadan, Ekiti.
3. Dr. J.F. Ade Ajayi, B.A. Ph. D.(Lond). Lecturer in History U.C.I., Ekiti
4. Dr. F.O. Dosekun, M.D., Senior Lecturer in Physiology, U.C.I. Ondo.
5. Dr. A. Olubunwo, M.A., Ph.D., Lecturer in Maths, U.C.I., Ekiti.
6. L.O. Ibukun, B.Sc., Lecturer in Physics, U.C.I. Owo
7. Mr. S. A. Adu, B.Sc.(Econ.), Research Fellow, U.C.I., Ekiti.
8. Mr. Ayo Ogunseye, B.Sc., (Econ.), Director Extra-Mural Studies, U.C.I., Ondo.
9. Mr. N.K. Adamolekun, B.A., Registrar, U.C.I. Akure.
10. Dr. C.I.O. Olaniyan, B.Sc., Ph.D., Lecturer in Zoology, U.C.I., Ekiti.
11. Dr. E. Emovon, B.Sc., Ph.D., Lecturer in Chemistry, U.C.I., Benin.
12. Dr. E.F. Ojo, B.Sc., Ph.D., Lecturer in Physic, U.C.I., Ekiti.
13. Dr. S.B. Akpata, M.A. Ph.D., Asst. Librarian, U.C.I., Benin.
14. Mr. R.A. Ogunlade, B.Sc., Tutor, Christ School, Ado-Ekiti, Ekiti.

Copies to :-

- (1) Chief Obafemi Awolowo, Leader of the Action Group.
- (2) The Western Region Minister of Education.
- (3) All Ministers & Legislators (Federal & Regional) in Ondo Province.

@ (4) To all Ondo Provincial Leaders, Councillors, Obas and Chiefs.

- (a) Nearness to a railway station and a well-developed port; this will facilitate the transportation of heavy equipment and make the University easily accessible to overseas visitors from whom a fair amount of endowment in money, books, engineering equipment etc. may be expected.
- (b) Proximity to centres having major engineering and industrial works and fairly well-equipped hospitals to which students of the applied sciences and the professions can have quick and easy access for the purpose of gaining practical experience.
- (c) Nearness to main centres of population in the country as a whole.
- (d) Availability of good houses for the accommodation of non-residential students.
- (e) The existence of reasonably well-developed social amenities - electricity, water supply, hospitals, good roads etc.

6. On the basis of the principles we enunciate above we are convinced that of all the places we have heard mentioned as possible sites for the proposed University, Ife is the most suitable.

- (i) Ife is only 24 miles from the nearest railway station at Ido. There is already in existence a good road connecting the two towns; this road is one of the best in the region. For this reason the haulage of heavy equipment from the port of Lagos to the new University is made less expensive and less of a problem. Moreover, this position of Ife makes it more easily accessible to almost all parts of Nigeria.
- (ii) Ife is within easy reach of Ibadan by a fairly good road. This fact is very important when it is realised that at the initial stages there will have to be constant and close consultation between the planners of the new University who are for the most part resident in Ibadan and the University authorities. In commenting on the location of the University College at Ibadan, Dr. Hollanby complained of the number of journeys he had to make to Lagos to consult with government officials. Dr. Hollanby must be thankful. His job would have been made a thousand times more difficult had the University been located at a point not so easily accessible to Lagos as Ibadan is.
- (iii) Lagos is still the main port of entry for most of the overseas visitors to the country. By reason of its nearness to Lagos and by reason of its ancient reputation a visitor staying for a short period in the country will be more likely to wish to run down to Ife than to go to any other of the places we have heard mentioned as the possible site of the new University.
- (iv) Ife is closer to the great engineering centres of the country. For example, students of engineering will be within easy reach of the civil engineering works going on in and around Lagos and Ibadan, the electrical works at Ijora,

CONFIDENTIAL

Chief Obafemi Awolowo,
Oke-Ade,
Ibadan.

Dear Sir,

Memorandum on the Siting of the Proposed University of
Western Nigeria: From a Committee of Disinterested
Citizens

The proposed University of Western Nigeria is a regional institution only in the sense that it will be financed largely by the Government of the Western Region. This is a fact of great importance. It must not however be allowed to overshadow the more humanitarian motive of the initiators of the project, namely, to provide a reputable centre of learning that will serve the needs of Nigeria and those of humanity.

2. In deciding the home of the new University just as in selecting the course of instruction within the University itself short-term sectional interests should not be given any consideration.

3. It will be unfortunate in the extreme if the proposed University is regarded in any quarter in this region as just another social amenity - electricity, pipe-borne water, hospitals, farm settlements, farm institutes, roads or industrial projects - to be distributed on the basis of the degree of political support which any given area has accorded the government of the day in the Western Region. Political support is a shifting sand which cannot be made the basis for siting a permanent institution such as a University.

4. In Great Britain and the United States of America where good roads, electricity, telecommunications, water supply, health and educational facilities are highly developed and widely distributed a University can be sited at any point without incurring additional expenditure in providing these essential services. This is not the case in Nigeria where these services are as yet relatively poorly developed. It is readily conceded that outside Ibadan any site chosen for a new University will almost certainly necessitate the provision by Government of one or other of these essential services. But the distance of a given site to Ibadan and the nature of existing social services on or near this site will determine the size of the initial capital outlay on roads, electricity and water supply and health facilities. Under this circumstance great care must be taken in locating the new University so that the provision of these items of social capital does not put an unnecessary strain on the limited finances of the Government.

5. We suggest that the following factors should form the basis for deciding the site of the proposed University:

...../2

the Railway mechanical yards at Ebute Metta and the projected multi-propose dam at Jebba which is going to be the best of its kind in the world.

(v) It is one of the aims of the new University to develop a renowned and reputable centre of African studies. Ife is the living centre of one of the world's ancient civilisations. Its museum attracts thousands of overseas visitors every year. Its shrines draws scores of scholars annually. Ife provides a ready laboratory for the historian and the archaeologist. In short, a "University of Ife" has half of its problem of recognition solved. Ife already has a name, and any University located in this city has "greatness thrust upon it" right from the start.

(vi) Ife does not live by its ancient reputation alone. It is a thriving modern city, a centre of trade and agricultural production. It is a city of 100,000 inhabitants with electricity, good roads and adequate water supply. It is a booming city with modern houses fit for the accommodation of non-residential students. Ife has a modern and well-equipped hospital. The proposed government hospital for the city can be remodelled in such a way as to serve the needs of the Medical Faculty. Furthermore, Ife has good and abundant agricultural land for the use of the Faculty of Agriculture and Home Economics.

7. In conclusion we want to emphasize that in proposing Ife as the site of the new University we are not motivated by sectional considerations but by the long-term interests of the institution and the country as a whole as well as by the objectives we outline in paragraph 5 above. We wish to call attention to the fact that none of the contributors to this document is from Ife or Ife Division.

We are,

(OVER)

Telegram at p.1. refers. Mr. Ogunlade on behalf of Ekiti AG conveys to the Honourable Premier the sincere thanks of the entire Ekiti people for Government's provision of amenities and bold schemes. He further implores the Honourable Premier to give sympathetic consideration to Ondo Province regarding the siting of ^{the} Proposed Western Nigeria University.

2. Following up the telegram referred to above, the Memorandum at pp. 2-4 was addressed to the Premier and Executive Council and copied to the addressees at p.3. The signatories to the Memo., most of whom hail from Ondo Province (vide p.4), strongly feel that "the best site for a University intended to serve Western Nigeria should be somewhere in Ondo Province". Their reasons for this strong view include:-

- (i) the situation of Ondo Province in a central position in the Region thereby forming a natural bridge between the Yoruba West and the non-Yoruba Mid-West;
 - (ii) the large size of the Province which ensures an unrivalled availability of suitable land for the purpose of the University etc, the important role of the port at Ogbaku and the general contribution of the Province to the economy of the region;
 - (iii) the fact that the University would attract private and public enterprises thereby aiding the development of Ondo Province which is now one of the least developed in the Region;
 - (iv) the realisation that by this, Government would not only be recognising the "complete, unreserved, unalloyed and unflinching support" of Ondo Province to it but would also encourage the people for a continued future support;
- and (v) the fact that the only other suitable site is the Mid-West which Ondo Province has superseded by the advantage of its central position.

3. The Memo. at pp.5-7 was addressed by the signatories at p.8 to Chief Obafemi Awolowo and copied to the Hon. Premier, Chief S.L. Akintola. This "Committee of Disinterested Citizens" as the signatories claim, warns that although the proposed university is a regional institution, the financial aspect of which largely devolves on Government, "short-term sectional interests should not be given any consideration". The University, they urged, should not be regarded as a social amenity to be distributed on the basis of the degree of political support of an area to the Govt. Such support, they warn, is usually an ephemeral feature anywhere.

Furthermore, they contended that the present condition of social services in Nigeria (cf Great Britain & U.S.A.) precludes the siting of a university just at any point without incurring additional expenditure in providing all essential services. They consider the following as essential factors

to be considered in the choice of a site for the proposed university:-

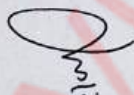

- (i) Nearness to a railway station and a well developed port;
- (ii) Proximity to centres having major engineering and industrial works and fairly well-equipped hospitals.
- (iii) Nearness to main centres of population in the country as a whole.
- (iv) Availability of good houses for the accommodation of non-residential students.
- (v) The existence of reasonably well-developed social amenities.

Finally the Committee is convinced that for the site of the Proposed University no other place yet mentioned is more suitable than Ife with all its advantages of proximity to the nearest railway line at Ode; to Ibadan; to Lagos; and its historical and cultural fame added to its modern development.

say
what it is!

(Vide paragraph 6 (i)-(vi)). Please note in particular parag. 7 which tends to prove the validity of the name "Committee of Disinterested Citizens".

4. The gist of the two memoranda is summarised above. I realise that it is too early and even improper to base any decision only on these two papers right now. However, I should be grateful for your views and kind direction about what further steps to take regarding the memoranda.

22nd October, 1960.

The Secretary to the Premier
& Executive Council,
Western Region,
IBADAN.

Dear Sir,

Proposed Western Nigeria University & Ondo Province

I am directed by the above-named Union to convey through you to the Government of the Western Region their representations with respect to the siting of Western Nigeria University.

It is unnecessary for us to inform the Government that Ondo Province is the largest and also the highest cocoa producing area in the Region. It is rich both in human and economic resources. In addition, the majority of our people are supporters of the Party that has formed the Government in the Western Region since 1952.

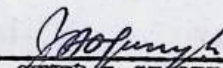

It is our belief that the Government has failed to satisfy our Province in Road Development, Electricity Supplies, Water Supplies, etc. The Government has not sufficiently encouraged the educational development of the people by augmenting their efforts to provide technical and secondary grammar education. Sapele, Ijebu-Ode, Oshogbo, Oyo and Agege have been provided with Trade Centres and Technical Institutes. Benin-city is to have a School or College up to the Higher School Certificate standard.

Ibadan is full of educational Institutions for higher learning. Industries, such as Cement Factory, Iafia Canning Factory, Aro Mental Hospital and etc. are sited in Ibadan and Abeokuta Provinces. Ikeja in the Colony Province has a Pepsi Cola Industry. There are no such institutions and industries in Ondo Province.

Ondo Province, the largest in the Western Region, is well situated geographically when considering its proximity to the Mid-West Area.

We therefore request that the proposed University of Western Nigeria should be built in the Province.

Yours faithfully,

GENERAL SECRETARY.

c.c. All Patrons and Legislators (both Western House & House of Reps.)

SPEC

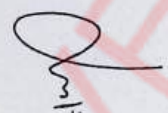

At p. 11 is a petition captioned "Proposed Western Nigeria University & Ondo Province" from the Ondo Provincial Development Union conveying through you to the Western Region Government the representations of the Union regarding the siting of the Proposed University.

2. The Union claims for Ondo Province credit for its large size, high production of cocoa, wealth in human and economic resources and the support given by majority of its people to the Party in power.

3. Citing several examples, the Union endeavours to establish the fact that Government has neglected this Province in its distribution of social services and economic projects.

4. In the opinion of the Union, Ondo Province with its geographical advantage should be adequately represented compensated by siting the Proposed University in this Province.

5. I shall be very grateful for your direction on this petition,

Proposed University in Western Nigeria

A request from the Obas, Chiefs and People of Abeokuta to Western Nigeria Government to Locate the University in Abeokuta

We, the undersigned, on behalf of ourselves and the other Chiefs and people of Abeokuta, invite the Western Region Government to site in Abeokuta the University to be established in Western Nigeria. We believe firmly that Abeokuta has particular and general conditions most suitable for the location of a University. But, before we advance the reasons for our request, we would like to express our appreciation for the progressive measures and laudable achievements which the Western Region Government has made, especially in the field of education since 1951.

Conditions Prescribed in Sessional Paper No. 12 of 1960

The four particular conditions that must be fulfilled by the place to be chosen are readily fulfilled by Abeokuta:

- (1) Physical Setting: Abeokuta has the physical setting appropriate to a University environment in that it has modern shops and some local industries which will be places of interest for the students. The Ogun River is another object of educational interest. Furthermore, the physical feature of the land is appropriate in that it is neither too plain to be monotonous and uninteresting nor too hilly to make the selection of a vast area of land for the University site and agricultural project difficult.
- (2) Agricultural Research: The Egbas have been farmers for generations and Abeokuta possesses a soil rich in fertility for a great variety of crops.
- (3) Accessibility: Abeokuta has easy access to all parts of Western Nigeria and, unlike many other Towns, it can be reached both by the railway and by trunk roads.

The International Airport at Ikeja which links Lagos with other parts of this Federation and, indeed, with the world is barely 50 miles from Abeokuta.

/2.....

See p. 20

(4) Facilities for Essential Services:

- (i) Water. Abeokuta has pipe-borne water and we are happy and grateful to state that an elaborate water extension scheme for which the Western Nigeria Government has provided a sum of about £650,000 is expected to be completed shortly.
- (ii) Electricity. In view of the fact that the Electricity Corporation of Nigeria has undertaken the expansion of electricity supply in Abeokuta and current will be got directly from Lagos, and that the supply will be fed by a high tension transmitter in Abeokuta, it is guaranteed that electricity will be adequately and satisfactorily supplied.
- (iii) Telecommunications: Abeokuta enjoys 24 hour telephone service exchanges, international telephone calls can be made, telegraph services are good, and cable services are available.
It is expected that automatic telephone exchange will soon be extended to Abeokuta.

General Conditions

In addition to the prescribed conditions mentioned above, there are other general conditions which make Abeokuta the rightful place at which to site the proposed University. They are as follows:

- (1) Nearness of Abeokuta to Lagos Wharf. The proximity of Abeokuta to the Lagos wharf is a great advantage in that heavy machinery and other essential equipment would be transported much easier, much quicker and at less cost. This will bring reasonable savings in the capital as well as in recurrent expenditure on the University.
- (2) Location of Abeokuta. Abeokuta has the unique advantage of being located midway - by rail and by road - between Lagos and Ibadan the Capital of Western Nigeria, and contact between the University and both Lagos and Ibadan will be easier than from any other Town in Western Nigeria.

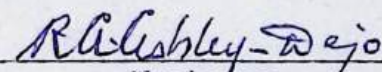

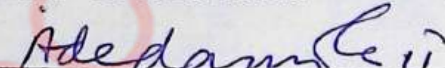

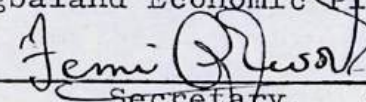

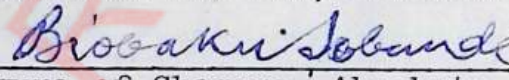

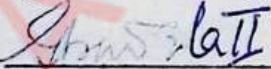

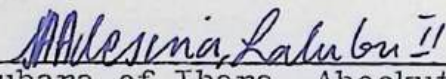

- (3) Nearness to Ikeja Air Port. The nearness of Abeokuta to the Ikeja Air Port will be a great advantage for the University professors, lecturers, administrators and visitors coming from or going abroad by aeroplane. All such people can easily contact the very important people and institutions in both Ibadan and Lagos.
- (4) Reasonable Distance from University College, Ibadan. Abeokuta is neither too far from the University College, Ibadan to make frequent contacts difficult nor too near it to make it hard for the new University to develop and project its own identity in all areas of higher education.
- (5) Availability of Land. Vast areas of suitable land for a University site are available at several places in Abeokuta and the Egbas are ready to surrender any of them at any time to the Western Nigeria Government for establishing the University.

Ideal Host Community of the Proposed University

A very essential factor that must be considered in siting a University is the cultural traditions of the host community. Abeokuta is rich in such cultural traditions.

The town is peculiar in that it has many townships within its walls. These townships have their historical background and heritage, traditional gods and their different modes of worship. It is the cradle of Western education and civilization in Western Nigeria. Scholars will, therefore, have ample opportunity for researches in agriculture, history, philosophy, theology, education, sociology and music.

The Egbas, amongst whom are many men and women who have had the benefit of higher education, will constitute an ideal community of hosts for the University.

A STATEMENT BY THE GOVERNMENT OF WESTERN NIGERIA ON
THE SITING OF THE PROPOSED UNIVERSITY

It is announced by the Premier's Office that the Government of Western Nigeria has now reached a decision on the siting of the proposed University. It will be recalled that in the White Paper on the establishment of the University in Western Nigeria, which was laid on the Tables of the Western Nigeria Legislature as Sessional Paper No.12 of 1960, Government laid down the conditions which a site for the University must fulfil -

- (i) it must have the physical setting appropriate to a University environment;
- (ii) it must be a place possessing the soil that is conducive to agricultural research;
- (iii) it must be at a point that is of easy access to all parts of the Region;
- (iv) it must have either already in existence or have facility of rapid development of essential services such as water, electricity and telecommunications.

The Government then went on to say that it "will be guided by the advice of experts who will conduct a survey of all possible sites in various parts of the Region and submit their recommendations in due course."

2. Since the publication of the White Paper, the Government has received very helpful suggestions as to the location of the University from many communities in the Region. All these suggestions have been carefully considered. The over-riding consideration, however, in the choosing of the site has been the report of the experts referred to above. Led by Mr. A. Sharon, an architect and town planner who has had

considerable experience in the planning of Universities, the team of experts undertook a survey of many towns and districts in the Region, bearing in mind the requirements of the proposed University. The team arrived at the unanimous choice of the area near the town of Ife as the most suitable and appropriate location for the University.

3. In the opinion of the experts, the district around Ife is centrally located in the Region, favourably linked by good roads with many towns and therefore facilitating a quick connection for students, professors and assistant staff coming from all parts of the Region. Furthermore, Ife is situated not far from Ibadan where the biggest University in the country is already in existence and developing fast. This will enable, if appropriate arrangements can be made, an exchange of professors, lecturers as well as experience in scientific research and achievement between the new University and the University College, Ibadan. Ife town has a population of 110,000. As well as being served by first class roads, it is only 23 miles away from the railways, the nearest railway station being Ede. The existing services include electricity supply by E.C.N., the local water supply which is shortly to be replaced by a larger scheme that is nearing completion. The existing amenities include many schools, a modern hospital, commercial banks and shopping facilities. Of a special architectural interest is the local Museum exhibiting the world famous bronze heads and terra cotta. Geographically, Ife lies within high-forest belt of the Region and is 800 feet above sea level. The annual rain fall is about 51 inches and the temperature varies between 60°F - 80°F and the mean relative humidity is 70% thus providing favourable climatic

conditions on the whole. Ife district is an attractive, slightly undulated wooded countryside. The district is rich in agricultural plantations and therefore has a soil that is conducive to agricultural research and development.

4. The Government has accepted the recommendation of the experts and accordingly decided that the proposed University will be sited near the town of Ife, on the actual location recommended by the experts, the detailed topographical survey of which will start immediately.

5. The Government has also accepted the recommendation of a panel of Western Nigeria intellectuals that the University should be named after the town near which it is sited. It has, therefore, been decided that the University shall be styled "The University of Ife".

6. The Government wishes to seize this opportunity to thank all those communities who have made suggestions or offered land in connection with the siting of the proposed University. Now that a site has been chosen, the Government is confident that everyone will accept its decision, bearing in mind that from its chosen site the object of the University is to cater not only for the needs of the Region but of the Federation as a whole and indeed of the other parts of the world, as indicated in the White Paper.

Sir,

Looking back into the trend of events in this Region for the past few weeks one can easily notice the prodigious educational project of your Government in planning to build a University which will enhance the academic status of this region.

In this aspect, we members of the above Union on behalf of all Ifes at home and abroad have cause to be proud of and show gratitude to your Government.

We are particularly grateful to your Government for conferring on us the great and invaluable honour of making our town the seat of one of the institutions of higher learning in Nigeria. We express our deep appreciation for this privilege in particular and for other past amenities which were provided us.

While wishing your Government a peaceful and prosperous reign, we hope your honourable will express our sincere gratitude to your colleagues in the Government.

Dear Sir,

University Site Ife:
Acquisition of Land For:

I am instructed by the Akui Family of Ile-Ife to enquire from you to whom representation should be made for the compulsory acquisition of their farm for the purpose of erecting the University of Ife. The Akui Family farm is about half the size of the area which has been earmarked for the establishment of the University of Ife. The family has cash and food crops on the land.

At the moment, it is not possible to determine the acreage but it is a fair estimation to put it at $2\frac{1}{4}$ miles long along the main road and about that much broad inside.

ARCHIVES OF OYSCAC

S.155/7/38

17th August, 1964.

His Highness
The Oni of Ife,
Afin,
IFE

Kabiyesi,

I am directed by the Honourable Premier to recall his discussion with Your Highness in connection with the location of the University of Western Nigeria which, it has been agreed, would now be sited in Ife. The reason for recalling the discussion at this stage is because of the delay in implementing the promise and obtaining the documents relating to the surrender of the land in Ife to the University Authorities as free gift to the Western Nigeria Government, with the proviso that compensation only would be paid by the Government at the usual rate for the crops found on the land when transfer took place.

I am to remind you, Kabiyesi, that the offer of free land for the University was accepted from the Ife community, through your intervention, in preference to other offers received from the communities in other parts of the Region for two or three reasons, namely Ife's historical and traditional importance coupled with its geographically central position.

I am also to express disappointment that the development of the site has been unduly delayed due to failure on the part of those concerned to execute the necessary legal documents which would make the acquisition of the land valid. I am, therefore, to ask for a formal confirmation that the land would be surrendered free of charge, subject to compensation for crops, and that the owners would be ready to complete the legal transfer as expeditiously as it can be arranged.

The Honourable Premier directed me to mention also that it was understood that an alternative site in some other part of Ife would be offered to the owners of the land who would be dispossessed by the above transactions. In any case, I should stress that the development of the permanent site of the University has been held up for too long, and that early steps must now be taken to check the handicap responsible for this.

It is respectfully asked that Your Highness would be gracious enough to use your good offices to assist in this matter.

I have the honour to be,

Kabiyesi,

Your obedient servant,

(T.O. Ejiwunmi)
Secretary to the Premier and
Executive Council

The Chairman,
Ife District Council,
Ife

Development of the Permanent Site of the
University of Ife

I am directed to bring to your notice the delay in the formal transfer of the land offered by the Ife community for the permanent site of the University for Western Nigeria. It had been understood that the land was being offered free to the Government subject to compensation being paid for the crops thereon only; and I am to point out that this particular offer was accepted out of a number of offers received for the same purpose from the communities in other parts of the Region because of the historical and traditional importance of Ife, and because of its geographically central position.

2. The delay in the development of the site, due to failure to conclude the formal surrender of the land in view, is becoming a source of considerable embarrassment to the Government as well as to the University Authorities. I am to request that you use your good offices to obtain a formal confirmation that the land would be granted free to the Government and that the legal transfer would be concluded as expeditiously as possible.

The Secretary to the Premier
and Executive Council,
Premier's Office,
I b a d a n.

P. 38

With reference to your letter No. S.155/7/38 of 17th August 1964, the University land at Ife was acquired during the time I was the Governor at Ibadan. There has never been any discussion with me as to whether or not the land would be a free gift. I believe the land was chosen by a committee appointed by the Hon. Premier to name a suitable place in the Western Region where the University should be built and to recommend a suitable site. I have never intervened in the transaction. Discussion took place between the officials of the Ministry of Land and Housing and the owners of land who put in claim when the acquisition notice came out in the Gazette vide W.R.N. No. 392 of 13th March 1961.

It has come to my notice that an Ibadan based Lawyer has become interested in the matter and has been a regular visitor to Ife. I also hear that other Lawyers at Ife have also become interested. I am saying all this merely to show that I have never had any direct dealing in the matter.

Would you kindly inform the Honourable Premier that since the receipt of the letter under reply, I have contacted a large majority of the land owners and can say that there would be no difficulty in persuading them to accept land in some other part of Ife instead of money for their land acquired by the Government. In fine I shall be glad if you will convey my thanks to the Honourable Premier for his wisdom and good sense in suggesting an offer of land instead of money.

Development of the Permanent Site of the University of Ife.

P. 39a
I am directed to refer to your confidential letter No.S.155/7/39A dated 17th August, 1964, and to inform you that at a meeting held with the land-owners of the permanent site of the University of Ife by the Chairman of the Ife Divisional Council (Management Committee) Prince D.A. Ademiluyi, on 25th of August, 1964, the following resolutions were taken in connection with the acquisition of land for the University of Ife:

- "(i) That all the land-owners affected by the acquisition of the permanent site of the University of Ife agree to grant their land free of charge to the Government and to take all steps to effect a legal transfer of such land to the Government as expeditiously as possible.
- "(ii) That early steps be taken to provide the land-owners concerned with compensation plots of the same size as those given up for the acquisition of the permanent site of the University in the first reserve referred to by the Chairman at the meeting.
- "(iii) That early arrangement be made to pay for the crops on the land being acquired and that in this connection immediate attention be given to the necessity for the calculation of the number of palm trees which were originally left out in the list prepared by representatives of the Ministry of Agriculture and Natural Resources in connection with the acquisition.
- "(iv) That the Regional Government be prayed to ensure that both at the construction stage and later when the University is fully established first consideration in the employment and recruitment of labour be given to Ife sons and daughters as a token of appreciation by the Government of the willingness of the land-owners to give their land free of charge to the Government for the establishment of the University."

In attendance:-

1. Chief Oyediran, Principal Lands Officer, Ministry of Lands and Housing, Western Nigeria.
2. Mr. Kunle Duduyemi, from the Chambers of Fani-Kayode and Sowemimo Solicitors, Lagos.
3. Mr. S. T. Fahm, Secretary, Ife Divisional Council.

PURPOSE OF MEETING :- The meeting was summoned at the instance of the Chairman of the Ife Divisional Council (Management Committee) to meet the land-owners of the permanent site of the University of Ife.

The Chairman, Prince D.A. Ademiluyi, opened the meeting by stating briefly the reasons which led to the meeting being summoned and by inviting the attention of all present to the contents of a letter No.S.155/7/39A dated 17th August, 1964, which he had received from the Secretary to the Premier and Executive Council on the delay in completing all formalities of the acquisition of the property and the consequent result of the inability of Government to start construction work on the site at Ife. He narrated the reasons why Government originally decided to site the University at Ife permanently despite the fact that offers were received from various divisions of the region, and he informed all present that it would be to the everlasting glory of Ife and would further enhance its traditional place in history if the present obstacles that have hindered the development of the permanent site could be cleared once and for all so as to allow work to commence on the site. He expressed his thanks to the people in answering his call by attending the meeting and placed before them the proposals which had been agreed by representatives of the division at Ibadan in connection with the matter.

Dr. the Hon. J.O. Omitowoju, who was also present, narrated the history of the University and how it was only possible to agree to the siting of the University at Ife after legislators from Ife had fought tooth and nail at Ibadan to convince the Government of the wisdom in siting the University at Ife. He implored the land-owners present to consider very seriously the proposals placed before them by the Chairman both in the interest of themselves, the economic advantage that would follow and that of the generations yet unborn.

The Principal Lands Officer also informed the meeting that the area to be acquired by the University had been surveyed and that a copy of the survey plan would be deposited with the Secretary of the Ife Divisional Council with a request that it should be made available to any of the land-owners who may wish to know the extent of his own land in the acquisition. He mentioned that the Ministry of Lands and Housing would do all that lies in its power to take early action in implementing the conclusions reached at the meeting and that the Ministry would also be responsible for the survey and demarcation of any new site that may be provided as compensation plots for those whose plots are being acquired for the purpose of the University.

Questions were asked by the various people present and these questions were answered satisfactorily by both the Chairman, Dr. the Hon. J.O. Omitowoju and others present.

Chief Alli Awoyera, Lowa of Ife, spoke on behalf of the Oni of Ife and informed the meeting that the proposals put forward by the Chairman had the blessing of His Highness the Oni of Ife who is most anxious to see that the development of the permanent site is commenced without any further delay and who is satisfied that by agreeing to pay for economic crops and provide compensation plots for those affected by the acquisition the Government would be doing a world of good to those affected as opposed to the making of cash payment for the land which would probably mean a loss of the means of livelihood after the money would have been spent and forgotten.

Prince Adeboye Adefarakan, in his own remark, thanked the Government and the Chairman on behalf of the land-owners, for the proposals placed before the meeting but emphasised that following the sacrifice which the land-owners are prepared to make they would wish that the Government in return would give first consideration to the employment of Ife sons and daughters both at the construction stage of the University and also when the University is fully established and becomes a going concern.

410
After some discussion it was RESOLVED:

- (i) That all the land-owners affected by the acquisition of the permanent site of the University of Ife agree to grant their land free of charge to the Government and to take all steps to effect a legal transfer of such land to the Government as expeditiously as possible.
- (ii) That early steps be taken to provide the land-owners concerned with compensation plots of the same size as those given up for the acquisition of the permanent site of the University in the forest reserve referred to by the Chairman at the meeting.
- (iii) That early arrangement be made to pay for the crops on the land being acquired and that in this connection immediate attention be given to the necessity for the calculation of the number of palm trees which were originally left out in the list prepared by representatives of the Ministry of Agriculture and Natural Resources in connection with the acquisition.
- (iv) That the Regional Government be prayed to ensure that both at the construction stage and later when the University is fully established first consideration in the employment and recruitment of labour be given to Ife sons and daughters as a token of appreciation by the Government of the willingness of the land-owners to give their land free of charge to the Government for the establishment of the University.

ADJOURNMENT :- The meeting adjourned at 5.10 p.m.

I am directed to acknowledge the receipt of your letter No. 686/33 of 27th August, 1964, and to express appreciation for the early steps taken by the Ife Divisional Council (Management Committee) to arrive at some decision with regard to the vesting of some land at Ife, which would serve as the permanent site for the University of Ife, in the Authorities of the University.

2. I am to ask you to take immediate action by legally conveying the property affected to the Western Nigeria Government through the Ministry of Lands and Housing. The latter will then vest the land in the Provisional Council of the University of Ife, by appropriate legal action.

Acquisition of land for Ife University

With reference to your letter No. LS.523/T/12 dated 19th October, 1964, I have to say that my information even before the letter was received was that following upon the publication of the acquisition notice, the land has been taken over and surveyed and that officials of your Ministry have been stationed there for the purpose of preventing other persons including the original owners from taking away valuable forest and other land produce. In these circumstances, the starting of actual building operations on the land now would not amount to any fresh act of taking possession and so cannot create any new situation in law.

2. As regards the preparation of instruments which would put beyond all doubt the Government's title to the land without having to pay compensation for its acquisition, you would recall that you have sent to me a copy of the Claims Plan for this purpose; I have not been able to complete action on the matter owing to pressure of work here but as soon as the draft instruments are completed the same would be forwarded to you.

(Lands Division),
Western Nigeria,
Ibadan.

I. A. Hassan v. Attorney-General and Another:
Suit No. HOS/57/65

I have to inform you that notice has now been received from the High Court Registrar at Oshogbo that the above-mentioned suit has been adjourned for hearing on the 24th of this month. As you would no doubt recall, the plaintiff in the case is claiming, on behalf of himself and the Orunto Family, compensation for the compulsory acquisition of their land at Ife for the purposes of the University of Ife. The case has been the subject of series of correspondence between this Ministry and your Ministry and also meetings at which were present representatives of the Forestry Division of the Ministry of Agriculture and Natural Resources as well as the Ife Divisional Council.

2. As I have informed you on more than one occasion before now the mere fact that the Government has acquired the land for the University under the provisions of the Public Lands Acquisition Law, Cap. 105, renders the Government liable to pay adequate compensation for the acquisition both under that Law as well as under the fundamental human right provisions in section 31 of the Constitution of the Federation. When it was disclosed that the intention of the Government with which the land owners at Ife agreed originally was that no compensation would be payable for the acquisition of the land although compensation would be paid for the crops growing thereon I prepared a draft Instrument the execution of which all the land owners would have absorbed Government from liability to pay compensation for the acquisition of the land as such in return for the Government using its good offices to obtain for the dispossessed owners alternative farming sites in some forest reserves in the Ife area. As far as I am aware, all the efforts so far made in the direction of getting this Instrument executed have been of no avail and the legal position as of today is that if the present case should go to trial and Mr. Hassan, the plaintiff should be able to prove the title of his family to the land as well as his right in law to sue on their behalf, the Government would be faced with no alternative but to pay a large sum of compensation to them. I need hardly add that this example will almost certainly be followed by all other land owners on the Ife University site with the result that the Government would in the end be liable to pay to everyone of them who can prove his title a very substantial amount of money; once any claimant succeeds in a court case like the present it is hardly to be expected that the other claimants would be willing to forego their lands and be satisfied with accepting compensation only for the crops growing thereon.

3. In view of the very great financial liability which could fall on the Government if nothing is done immediately along one or the other lines which have previously been canvassing in this matter and which will lead to the withdrawal of the case from the court, I feel that I should bring this matter once again to your notice in order to apprise you of the gravity of the situation. If nothing is heard further before the case is due to come up for hearing, this Ministry would have no alternative but to rely only on whatever technical legal defence might be open for the purpose of questioning

- 2 -
CONFIDENTIAL

the stand of Mr. Hassan to bring the present action and if that defence should fail then it should be noted here that there is nothing else that we can do to make the case succeed purely on its merits as regards the Government's liability to pay compensation for land compulsorily acquired.

4. Copies of this letter are being endorsed to the Secretary to the Military Government and the Permanent Secretary, Ministry of Finance, for their information.

(1) U.A.C. who had applied for a renewal of their felling licence would be granted a renewal only on the understanding that they completed felling within one year.

(ii) The Ife Divisional Council would ask His Highness the Oba of Ife to grant the land to the claimants in the same way as they had obtained their present land. The Secretary assured the Meeting that the Oba was the person empowered to dispose of the land and that no compensation would be payable to any private person.

5. The meeting asked for an assurance from Mr. Fahn that the Ife Divisional Council would give priority attention to the inspection of the land and that they would provide a sketch plan showing the areas found to be suitable.

6. Mr. Agbaje-Williams asked what steps would be taken to persuade the members of the Orunto Family to withdraw their claim for cash compensation and accept alternative land. Mr. Fahn said he would ask the Chairman of the Council to assist in negotiations with that Family.

7. Mr. Warner asked who would provide the road to give access to the land. It was thought that the roads left by U.A.C. after their timber felling would be adequate but that the Council should bear the cost of any extra work needed on them to make them acceptable to the claimants.

8. Representatives of the Landowners:- Prince A. Adefarshan, Benjamin Adelowo and Philip Akinola were then invited to join the meeting. The Principal Land Officer explained the action which was proposed. The Landowners had some doubts about the fertility of the Southern part of F.2 but Mr. Ladipo said it was more fertile than the Northern part. They promised to assist to persuade the Orunto Family to withdraw their action provided Government acted more quickly in providing the alternative land. They asked that crop compensation payments for the crops destroyed on the University Site be paid promptly. The Principal Land Officer promised to write to the Ministry of Agriculture and Natural Resources about this and also to find out from the University of Ife on what dates they expect to occupy each part of the acquired area.

SP/S. 1941 June, 1966

Mr. P. T. Odumosu, M.F.R.,
Secretary to the Military Government,
Western Provinces,
Ibadan.

Dear Mr. Odumosu,

I had discussion with Mr. Adebayo, this morning, on the use of the Ibadan site of the University of Ife and we agreed generally as follows (Professor Ojo, Dean of Science was present):-

1. The University of Ife should continue to use the Ibadan site as a sort of preliminary science school. For this purpose the University is creating a General Science Department with a Dean of General Science. The Department would take a minimum of 500 students who will be prepared for entrance to the pure and applied Science Faculties of this University and to those of the other Nigerian Universities. The staff of the General Science Department will be staff of the University.
2. The University will require only £50,000 (and not £750,000) to convert the buildings that will be vacated into science laboratories. It is proposed that Government should find this amount. There is no intention to remove the equipment in the science laboratories to Ife. The aim is to augment them.
3. Queen School, Ede, should not be moved to the site. Even with the move of the proposed Home Economics College to the site, we cannot convince those who want to extend their empire to the site that by using it for a secondary school and a home economics school, we are using it for a purpose which is national in character. It is suggested that Olunloyo should join the General Science Department of the University at the Ibadan site and Queen School should be moved to Olunloyo. It may be argued that it will cost Government about £250,000 to bring Olunloyo to standard. If we lose the Ife site, as we are likely to do if we move Queen School there, we will then have to find over £400,000 to build a new place for the school.
4. The staffing of the General Science Department will be the responsibility of the University while the cost of maintaining the site will be borne jointly by the University and the Ministry of Education. It will be possible to get external

CONFIDENTIAL

assistance for a Science School. To further give the stamp of the University of Ife to the site, we are considering leaving the Institute of Administration in Ibadan. The Institute will need to take over the building now housing the Law Faculty.

I propose a joint committee of the University and the relevant Government Ministries to work out the details of these proposals.

Yours sincerely,

H. A. Oluwasanmi
H. A. Oluwasanmi
Vice-Chancellor.

P. 65

I am referring to your minute Ref. No. SP/S.194/65 of 13/11/67 in connection with the complaints of people displaced on the site occupied by the University of Ife at Ile-Ife. I am quoting below extracts from the minutes of the Principal Lands Officer explaining the arrangements on hand both in respect of the payment of outstanding compensations as well as the provision of an alternative site -

"P.S.

The Land for the University of Ife (13,852 acres), was acquired on the understanding that the Ife Divisional Council would provide alternative land to the displaced landowners. It has been suggested that suitable land could be found within the Forest Reserves of the Council. The Forestry Division of the Ministry of Agriculture & Natural Resources inspected a number of areas including Area F3, but have not made any recommendations. The matter is between the Council and the Ministry of Agriculture & Natural Resources. Once the land is provided this Ministry will lay it into allotments for the displaced landowners.

2. All the crops on the acquired land have been counted and assessed. Payment of compensation awaits allocation of funds from the Treasury. Since the land has been acquired the University Authorities are right in disallowing the landowners from harvesting the crops. "

??????

P.L.O.

15 November, 1967."

2. I feel the explanation given on our side is adequate as it would appear that the matter is now being handled by

67

the Ministry of Agriculture and Natural Resources. I will, however, cause a letter to be addressed to the Ministry of Agriculture and Natural Resources requesting for an early decision regarding the provision of an alternative site.

SP/S.194/68

27th November, 1967.

His Highness The Oni of Ife,
The Afin,
IFE.

Kabiyesi,

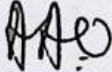

I am directed to refer to the complaints of the people displaced from the site now occupied by the University of Ife to which attention of His Excellency has been invited.

2. I am pleased to inform Kabiyesi that all the crops on the acquired land have been counted and assessed and payment of compensation will be made as soon as possible.

3. The laying out into farm plots of area F3 for the farmers affected is the concern of the Ministry of Agriculture and Natural Resources which has been directed to give the matter urgent attention.

I have the honour to be,
Kabiyesi,
Your obedient servant,

(A.A. Ogundepo)
for Secretary to the Military
Government.

Ref: CS. 3/422

Dear Mr. Odumosu,

Survey of Squatters on University
of Ife Land

The Finance and General Purposes Committee of the Provisional Council of the University last Saturday (8 March, 1969) considered a Report on a Survey conducted by our Department of Economics on the squatters on University Land at the Ile-Ife Campus.

The Committee was concerned at the delay in settling the question of compensation to the land-owners and felt that arrangements should be made to discuss the acquisition of the land and related matters with the Government as soon as possible. The Committee has accordingly asked me to send you two copies of the Report for your consideration and recommendation to His Excellency for appropriate action which will enable the University to avoid any embarrassment as regards the development and use of the land.

The University would also wish to have an early opportunity of discussing the issues raised in the report, particularly regarding the questions relating to compensation for crops, resettlement, and the legal rights of the University on the land, with you and the Commissioners of the Ministries concerned and their Permanent Secretaries. The Chairman of the Provisional Council (Chief T.T. Solaru), the Vice-Chancellor, Mr. Owolabi Kolawole, Professor S. A. Aluko and Dr. A.A. Adegbola will represent the University.

Dear Vice-Chancellor,

Survey of Squatters on University of Ife Land

In October 1967, the Faculty of Social Sciences was asked to conduct a survey of squatters on the University of Ife land. In February 1968, the Development Committee authorised a grant of £370. 13. 10d out of the Faculty of Social Sciences Research Funds for the conduct of the survey.

P. 73

I now submit an unbound copy of the 119-page survey. The survey was conducted by the Department of Economics with the assistance of the students in the Faculty.

We received active co-operation from the squatters, their leaders, their legal advisers and His Highness, the Oni of Ife. Also the Ministries of Agriculture and Natural Resources and Lands and Housing assisted us.

This survey was planned to be completed in June 1968, but the difficulties of getting accurate data from the squatters and the Ministries plus the amount of statistics that it involved had delayed its completion till this time. Also it took some time before we could get access to the Forest Reserve F3 - the alternative land to be given to the squatters. The delay itself has increased travelling and typing costs as figures of squatters and compensation kept changing. We are planning to get 50 copies of the report bound but the fund voted for the survey is almost completely spent.

I wish to say that the bulk of the ground-work survey was conducted by Dr. O.A. Oguntayo and the students. My role was mainly supervisory, contact-making and directional.

Yours sincerely,

S.A. Aluko

FACULTY OF SOCIAL SCIENCES

SURVEY OF SQUATTERS ON UNIVERSITY OF IFE LAND

PROBLEMS DEFINED

1. The government of the Western Region (Now Western State) of Nigeria, after considering various offers of land from different provinces of the region on which to build the proposed University of the region, decided in 1960 to locate the University at Ile-Ife; and for this purpose, acquired the present site (13,852.00 acres) for the purposes of the University. The acquisition was made on the following considerations:

- (a) that compensation will be paid for economic tree crops already planted on the land;
- (b) that no compensation will be paid for the land itself;
- (c) that alternative land would be provided for the resettlement of the displaced land owners and tenants.

The people occupying the land were informed accordingly and asked to vacate the said land in 1960. About 900 i.e. 64.3%, of those concerned obeyed this instruction.

2. With the move of the University from its temporary site at Ibadan to its permanent site at Ife in January, 1967, it was discovered by the University authorities that there were still some squatters on the University land.

2

In 1967, the Registrar of the University, Mr. H. Balmond, wrote the squatters to vacate University land within seven days. As there were still some squatters on the land on the expiration of the notice given, and in order to avoid strained relationship between the University and the people of Ife, the Vice-Chancellor, Professor H. A. Oluwasanmi, authorised the Faculty of the Social Sciences to conduct a socio-economic survey of the squatters with a view to identifying them, their problems and their expectations, and make recommendations to the University.

-
1. See Appendix 1, page 21 : Payment for crops was not mentioned in the original acquisition notice No. 392 of 1961. The Promise to give the displaced land owners and tenants alternative land was a subject of correspondences between the Ministries of Land and of Agriculture, His Highness, the Oni of Ife, and the lawyer of the land-owners and tenants. It was not a condition in the 1961 Acquisition Notice.
 2. See Appendix 2, page 23.

3. The survey was conducted between March and August, 1968, through a detailed process of interview. With the aid of questionnaires (appendix 3), students and staff of the Faculty interviewed 809 persons, including all the previous owners of the land i.e. about 56% of all previous tenants and owners of the land. (appendix 4)

4. In addition, several meetings were held with the Oni of Ife, the permanent secretaries - Ministry of Agriculture and Ministry of Lands and Housing, Ibadan; the Chief Forestry Officer, Ibadan, the Superintendent of Agriculture, Ife Division, as well as with the representatives and the legal advisers of the people, previously occupying the land.

5. Using the above-mentioned procedure, we were able to identify the major problems involved in the resettlement of the squatters.

6. His Highness, Sir Adesoji Aderemi, The Oni of Ife, informed us during our interviews with him that the Western State Government rejected the offer of land which he made in 1960, for the building of the University but instead decided to acquire the present site. Had the land offered by the Oni been accepted by the Government, the Oni maintained, there would have been no resettlement problems. He insisted that the government should, therefore, provide alternative site for the resettlement of the displaced people as there is no available communal land in Ife for this purpose. He has therefore proposed to the ~~government~~ that 21 sq. miles of land - the area of the present University of Ife Campus - should be released out of the forest reserve - F.3. on Ondo Road, about 20 miles off Ile-Ife, for the resettlement of the land-owners and the squatters. The Western State Government has however not yet released the land. (see appendix 5 ; the minutes of the first meeting held with the Oni).

7. We find no evidence to justify the claim that the government acquired the present University site without the active participation of the Oni and his people or that the acquisition was made on the condition that the government would provide an alternative site for

the people occupying the acquired land. However, there were correspondences between the Oni, the Ministry of Agriculture and the Military Governor in 1967, i.e. 7 years after the acquisition of the University land, in respect of the release of the forest reserve.

8. Having discovered that most of the squatters can, in fact, not find alternative land, the Dean of the Faculty of Social Sciences, Professor S. A. Aluko, discussed, several times, the question of the release of part of the Forest Reserve F.3 with Senior Officials of Government. The Ministry of Agriculture seemed to be willing to release between 10-12 sq. miles of land out of F.3 Forest Reserve for the resettlement purposes. The Oni and the other land-owners, however, insisted that the 10-12 sq. miles of land agreed to be released is inadequate. The question of a new resettlement site having been resolved, therefore, it would have to be determined what area of land will be adequate for the resettlement and the best way of allocating the land among the squatters.
9. The next problem deals with the compensation agreed to be paid by the government for the economic crops on the land. One could not ask why the government should acquire land on promise of compensation in 1960 and then fail to pay such compensation 8 years after. It is no surprise that the squatters have refused to leave the University land. Those who obeyed the government's instruction to quit the land, have been vegetating for upwards of five years, hoping against hope for the payment of their entitled compensation, thus being penalised for being the more law-abiding groups among the squatters.
10. In 1967, when the government finally began to pay part of what it owed to the farmers, the Ministry of Agriculture organised the payment in such a way that instead of bringing the much-needed relief to the peasants, it has caused confusion and more discontent. We have investigated these problems with a view to determining:-
 - (a) the ownership of the land acquired by the University, the number of landlords and tenants involved.
 - (b) The amount of compensation agreed to by the government versus what has actually been paid and received by the displaced persons.

(c) the method of resettling the displaced land owners and tenants; and

(d) recommendations for an effective settlement between the Western State Government, the land-owners and the University of Ife.

THE SQUATTERS

11. The major part of University land is claimed to have been previously owned by 16 families. Analysis of our survey revealed the following :

Table I : Land-owning Families of the University Land

NO.	NAME OF FAMILY (Landlords)	TOTAL ACREAGE OWNED	% OF TOTAL LAND	NO. OF SQUATTERS (Landlords and tenants)	AVERAGE ACREAGE OF LAND PER SQUATTER
1.	ABON	989.7	7.1	37	26.7

17.	OTHERS	1612.7	11.6	5	
	TOTAL	13,852	100.00	809	17.2

(1) OTHERS include MODAKEKES IN ASUN AND PARAKIN WHO REFUSED TO CO-OPERATE.

12. Table 1 shows that four families - Akeran, Akui, Olubushe and Oni - owned 7,154.7 acres i.e. 51.6% of the total land, out of which 6,106, (44.1%) belonged to the stool or the royal families of Ife (that is, Olubushe, Oni..)

The 16 families consist of sub-families and influential individuals who had acquired personal and sub-family rights of possession through long period of stay on the land. Many of them had surveyed and conveyed their lands, as follows:

13. A reconnaissance of the whole land reveals that between $\frac{1}{3}$ and $\frac{1}{2}$ of it is made up of hills, rivers and uncultivated forest. This is important when an alternative resettlement land is being considered. There were about 4000 peasants directly or indirectly carrying out farming activities on the land before its acquisition by the government. (see appendix 6). Among them were 425 land-owners, i.e. members of the families owning the land including one Mid-westerner who claimed to have bought his farm. Table 3 shows the geographic origin of the owning families and their tenants.

* OTHERS - mainly from Ipetu-Modu, Ede, Oshogbo, Iwo, Illa, Ilesha, Imesi and Urhobo.

A = Absentee Landlord : i.e. those who rented their land to tenants

B = Active Farmers.

14. Columns 1 and 4, Columns 1,2,4,5,7,8,10, and 11,
Table 3 show that 262, i.e. about 61.5% of the land-owners are
not active farmers; and as such they are not physically present on
the University land. Furthermore, one gains the impression that they
have other means of livelihood. Although they derive some income in
the form of rent from the land, they do not in fact form part of the
squatters on the land. Thus, the squatters comprise 119 citizens
of Ife (i.e. about 22% of the total, out of whom 99 were land-owners)
330 Madakekes (60%, out of who 45 owned their farms) 55 Moros (10%, out
of whom 18 owned their farms) and 43 others (8%, out of whom only one
owned his farm). We therefore have a total of 547 squatters including
land-owners. If we allow about 10% margin of error, there will then be
about 600 people actively engaged in farming at present on the
University land, who need to be urgently resettled outside the Campus.

15. The population of the squatters appears, on the whole, to be
ageing. Those of them who are 45 and more years old are about 8% more
than those below 45 years old. Table 4 shows that 30% of the squatters
are above 55 years old while 24% are between 45 and 55 years old;
36% are within the age-group of 30-44 years, and only 10% are below
30 years old.

16. It is quite obvious that those who are above 55 years old may,
because of their age, find it extremely difficult to start farming
activities afresh in a new place which is likely to be about 30 miles
away from Ile-Ife. In fact, these people have given strong indications
that, although they will not reject any alternative land which might be
given to them, their main problem as far as the University land is
concerned, is how to get the compensation for economic crops promised
them by the government. 149 farmers might thus be left out of
consideration for urgent resettlement outside the Campus. However, it
is desirable that some land be made available for distribution among
these farmers because their children might eventually like to take up
farming in future. The need to make this allowance becomes more obvious
when we take into consideration the strong Yoruba tradition of children's
expectation of land heritage from their land-owning parents.. The 42
landless squatters may be termed 'tenants-at-will' (see para. 32).

BELOW 30 "	10	35	7.2	49.2	11.1	11.1	19.4	10.6

17. As a result of the mass exodus of the previous occupants, the location pattern of the squatters has changed tremendously. At the moment, there are only three concentration of the squatters on the University Campus. (See FIG.I). The largest concentration is at Agbogbo/Kajola area. It extends from the University farm to the boundary of the Campus on IFE - ILESHA ROAD, and the area taken up by the squatters is about 4,570.3 acres. About 300 farmers, i.e. about 50% of those to be resettled are in this area occupying about 33% of the land.
18. The second concentration of the squatters is at Parakin/Modomo area. It stretches from about Mile 3 on IFE/EDE Road to Asun, which is located around Mile 17 on the same road. Here, about 150, i.e. 25% of the squatters occupy about 1,643.7 acres (12% of land). The third is at Olumogbe/Owa - an area extending from the back of the female hostel to the western boundary of University land (Ede end). 70 (12.0%) farmers occupy about 2,364.3 acres. (17% of land).
19. The squatters are thus occupying about 9,000 acres of University land, i.e. about 14 sq. miles or about 65 percent of the total ^{University} area. Considering the fact that about a third of this land consists of uncultivated bush, hills and rivers, an estimate of the total acreage occupied by the squatters at present is about 6,000 acres, i.e. about 9.3 sq. miles or 43 percent of the total area. A release of 10-12 sq. miles of land out of the Forest Reserve F.3 as promised by the Ministry of Agriculture and Natural Resources should immediately meet the resettlement

needs of the squatters, while negotiations may continue for the release of compensatory land to meet the future needs of expansion and for reserve. Figure I shows the density of squatter population on University land.

COMPENSATION

20. The Ministry of Lands in conjunction with the Ministry of Agriculture conducted during 1964-66, a survey of 1574 farming units which were then in operation for the purpose of payment of compensation for economic trees. The Ministry of Agriculture and Natural Resources agreed that a total sum of £193,658. 15. 9¹/₂d should be paid as compensation to the farmers.¹
21. Thirteen economic trees were identified and the rate of compensation are as follows :

<u>Crop</u>	<u>Amount of compensation per tree</u>	
	s.	d.
(1) Coco-nut	4	8
(2) Cola-nut	4	7
(3) Mangoes	3	11
(4) Oranges	3	7
(5) Breadfruit	2	0
(6) Oil Palm	1	5 ² / ₂
(7) Cocoa (6 years old and above)	1	3
(8) Cocoa (below 6 years old)	1	0
(9) Coffee	0	9
(10) Wallnut	0	6
(11) Plantains	0	5 ¹ / ₂
(12) Pine-apples	0	4 (per plant)
(13) Pepper	0	1

The squatters complained bitterly that they were not informed of the type and number of economic trees counted on their respective plots, nor of the rate of compensation paid per tree. We are sure that in the absence of the necessary information, the squatters are unable to judge whether the compensation offer made to them is just or not, in the light of the valuations made. If a farmer, for instance, feels that his trees have been inadequately assessed, he can then lodge a protest with the Ministry, only if he is aware of compensation payable by type of trees.

22. As on 24th January, 1967, a total sum of £44,300. 6. 2¹/₂d was claimed by the Ministry of Agriculture to have been paid to the farmers as compensation out of a total sum of £193,658. 15. 9¹/₂d, leaving a balance of £149,358. 9. 7d still outstanding, as revealed by the following table:-

-
1. Ministry of Agriculture, Ife Division Memo No. IFC.152/113 of 24th November, 1966.
 2. Compensation is paid for oil palm trees only if they are in a plantation. Wild growing oil palm trees command no compensation.

needs of the squatters, while negotiations may continue for the release of compensatory land to meet the future needs of expansion and for reserve. Figure I shows the density of squatter population on University land.

COMPENSATION

20. The Ministry of Lands in conjunction with the Ministry of Agriculture conducted during 1964-66, a survey of 1574 farming units which were then in operation for the purpose of payment of compensation for economic trees. The Ministry of Agriculture and Natural Resources agreed that a total sum of £193,658. 15. 9¹/₂d should be paid as compensation to the farmers.¹
21. It has not been possible for us to ascertain the basis used in working out the amount of compensation. Despite repeated requests and visits to the Ministries of Agriculture and Natural Resources and their Ife office and the Ministry of Lands and Housing, the information was not forthcoming. The squatters complained bitterly that they were not informed of the number of economic trees counted on their respective plots, nor of the basis used in compiling their compensation. We are sure that in the absence of the necessary information, the squatters are unable to judge whether the compensation offer made to them is just or not, in the light of the valuations made. If a farmer, for instance, feels that his trees have been inadequately assessed, he can then lodge a protest with the Ministry, only if he is aware of compensation payable by type of trees.
22. As on 24th January, 1967, a total sum of £44,300. 6. 2¹/₂d was claimed by the Ministry of Agriculture to have been paid to the farmers as compensation out of a total sum of £193,658. 15. 9¹/₂d, leaving a balance of £149,358. 9. 7d still outstanding, as revealed by the following table:-

1. Ministry of Agriculture, Ife Division Memo. No. IFC.152/113 of 24th November, 1966.

Source: No. IFC. 152/113 Ministry of Agriculture Memo: 24th Nov. 1966.

* $\frac{1}{2}$ d was omitted from the Ministry's amount in error.

A rough check of the lists of those entitled to compensation, shown in appendix 6 indicate that 1394 farmers were operating the 1575 units, i.e. some farmers were having more than one farming unit. Our investigation further revealed that some farmers had their farming units scattered among the 8 plots shown in table 5. Appendix 6 shows that some of the farmers have received their compensation entitlements, others had only been partly paid, while the majority of the squatters (about 80%) had received nothing whatsoever. It does not appear to us that there has been an equitable distribution of the fund made available for payment of compensation among the squatters.

23. Furthermore, an examination of the compensation claimed to have been paid by the Ministry revealed some irregularities. For example, the summary of the compensation claimed to have been paid by the Ministry of Agriculture, (reference Confidential Memo. No. IFC. 152/113 of 24th November, 1966) does not tally with the total of individual payments contained in the schedules submitted in support of the ministry's summary. Something is therefore wrong some where. Our random sampling

of 13 farmers among those supposed to have been paid also shows the following:-

Table 6.

Random Sampling of Compensation to Farmers

Name of Farmer	Amount Claimed to have been paid by the Ministry (1)	Amount Actually Claimed to have been received by the Farmers (2)
1. JOHN ADEGBAJU	£170: -: 5d	£120: -: -
2. RUFUS OLADAPO	186: 14: 9½d	180: -: -

TOTAL	£940: 3: 11d	£868: 4: -

Sources: (1) Ex. No. IFC/152/113 op.cit. xx (2) Answers to questionnaires.

24. Table 6 shows that there is a shortfall of £71: 19: 11d between the money paid and the actual receipts by the 13 farmers. The table further reveals that 2 farmers even claimed to have received amount in excess of the amount paid by the Ministry, while the others received amount less than the claims made. We have not been able to obtain any satisfactory answers for the discrepancies.

25. The method adopted by the Ministry in respect of compensation for economic trees on the University land is totally unsatisfactory. It has led not only to irregularities, but also to confusion and misunderstanding. Farmers have been put in a state of suspense for the past six years, and this has affected adversely their farming activities with resultant instability in ^{their} income. It has been claimed by the farmers that they have been unable to plant more than temporary crops; have been unable to invest money in rehabilitating their already mature economic crops because they have been waiting to move, and they have been unable to make any long term plan for their own future as well as for that of their families. The location of the University which is a source of joy to them is indeed regarded as an economic disaster to their livelihood

26. The action of the Ministry has, on the other hand, hampered an orderly development of the University land. In fact, it has compromised, to a large extent, the legal rights of the University with regard to the land. For example, the Law Faculty expresses doubt as to whether the University can legally eject farmers who have accepted the compulsory acquisition of the land but who have not been compensated for the economic trees - a condition ^{subsequently} ^{conditions of} stipulated in the acquisition.

(C) METHODS OF RESETTLING DISPLACED PERSONS

27. There are three possible ways by which any new land could be distributed among the existing squatters:

(a) the land might be distributed among the 16 land-owning families in proportion to the size of land previously owned on the University campus on the understanding that the families will distribute the land among the squatters. This is the method suggested by His Highness, the Oni of Ife, and the land-owning families.

28. Two strong objections raised by the squatters need to be seriously considered, if this method is adopted. First, the families might refuse, for one reason or the other, to allocate land to some of the squatters with the result that the adversely affected ones might justifiably refuse to leave the University land. Secondly, members of the land-owning families, who were not previously farming on University land, might now demand plots on the new site. The families, having to give priority to the demands of these new-comers, might then be left with inadequate land for the resettlement of the squatters. When we

consider the importance which is now attached to the value of land in Nigeria, particularly its saleability, we do not consider these fears of the squatters to be groundless.

29. The second alternative will be to distribute the new land among the squatters in proportion to their present holdings without unnecessary interference with the existing relationship between the tenants and their land-owners. The land-owners correctly pointed out that this procedure will penalise previous occupants who had voluntarily obeyed the government instruction and left the University land or had been forced to quit the already developed part of University land.

30. The third possible alternative is for the government to release the maximum of 12 sq. miles, i.e. about 8,000 acres of land, out of which 6,000 acres can be used in resettling the squatters and the remaining 2,000 acres allocated to the land-owning families.

31. In order to be able to decide on the best possible method of distributing the new land, we make a background analysis of how the squatters came to occupy the land.

32. TRADITIONAL TENANTS: Owing to lack of a better terminology, all the squatters, except the 42 tenants-at-will (see para. 14) and one Mid-Westerner who claimed to have bought his farm, are classified as "traditional tenants" because the university land was previously communally owned by families and the individual members have only the right of usage which can be passed on to their children in case of death.

33. These so-called 'traditional tenants' can be divided into the following groups:-

(a) THE MODAKEKE FARMERS: There are about 300 farmers in this group. They were the original owners of the land which they now occupy, having settled there between 1849 & 1860. As a result of pressure from Ife in 1909, the people were dispersed from the land and their land was taken over by the Oni (1553.57 acres), and the leading Ife chieftaincy families - Olubushe (2,388 acres), Akui (1,591.66 acres), Orunto (550.33 acres), and Egbuede (861.3 acres), etc. The Modakekes are mainly concentrated in Agbogbo/Kajola and Owa areas, while some are to be found in Parakin and Asun.

34. After the first world war, the Modakekes were allowed to return in 1924 to the land on condition that they paid 5 yams per family per annum to the new Ife owners of the land. Furthermore, they (the Modakekes) were not allowed to tap the palm-trees nor fell the Iroko and allied trees which remained the property of the Ife families. By late 1920s, additional rent, averaging 2 stone weight of cocoa or its money equivalent per annum was demanded by the families (except the Oni) from the Modakeke farmers.
35. Among the Modakekes, those in Parakin and Asun deserve special mention. We have no evidence to show that these people ever paid tributes or rent (ishakole) to any Ife family at any time. They may therefore rightly be considered as the rightful owners of the land which they now occupy.
36. Considering the above-mentioned historical facts, the Modakeke squatters on the University land, although 70% of them are tenants, they are in fact not tenants-at-will. Land at F.3 can justifiably be allocated directly to them, and not through any intermediary families. This does not necessarily absolve them from continuing to pay the present nominal tributes (ishakole) to the Ife owners. This procedure will enable the resettlement of these squatters on the prevailing status quo.
37. On the other hand, if the land should be given to the Ife families and they, for one reason or the other, do not wish the Modakekes to continue the use of it, the University as well as the government will find it extremely difficult to get the Modakeke squatters out of the campus without resorting to the use of force, which we do not recommend.
38. (b) THE MORO FARMERS: There are 55 Moro farming squatters. Historically, they are members of the non-Ife clans such as Ipetu-Modu, who originally owned and occupied that part of the University land stretching from Opa-river (Road 1) to Asun on Ife-EDE Road. As a result of boundary adjustments after the first world war, Ife land was extended and about 37 of the Moro farmers on the University land became tenants of Ife families - Abon and Akui - to whom the land was reallocated. Like the Modakekes, the Moro tenants are not tenants-at-will. They enjoy the right of usage of the land in perpetuity on the payment of a nominal tribute (ishakole) which is, on the average, 2 stone weight of cocoa or its money

equivalent together with five pienes of yams per annum. In fact, some of the farms have passed from hand to hand. Like the Modakeke squatters, in order to avoid their being dispossession of their land, land at F.3 might reasonably be allocated directly to them and not through the Ife land-owning families, while they should continue the payment of the prevailing tribute to their present landlords.

39. TENANTS-AT-WILL: 62 squatters, among whom are 20 Ife farmers, constitute the tenants-at-will. In as much as the use of land by these squatters is solely at the discretion of the land-owners, the land at F.3 which will be allocated to them should be given to the landowners, who may then decide whether or not to reallocate the land to their present tenants.
40. IFE LAND-OWNERS: 16 Ife families (although Moro family does not regard itself as Ife) previously owned the land, which the University now occupies. Our survey shows that 99 members of these families are actively engaged in farming on the land and have thereby acquired the right of usage of their individual farmland in perpetuity. As the land already occupied by these people is in fact no longer available for the use of other members of the families, it is only reasonable that these 99 land-owners be directly allocated land independent of land which might be available for distribution among the remaining members of the families.
41. In the light of the above analysis, we present in tabular form the three possible methods of distributing the new land at F.3 in Tables 7, 8 and 9 respectively. We are in favour of distribution of land based on Table 7.

Table 7: PATTERN OF LAND DISTRIBUTION AT F.3 ACCORDING TO THE FIRST METHOD

NAME OF FAMILY	% of University Land Owned	Share of New Land at F.3 in acres	No. of Squatters	Average Acreage of Land per Squatter at F.3
1. ABON	7.1	426	37	11.5
2. AIYEDUN	3.1	186	26	5.0

TOTAL	3115	971.5	377	217.3	457.8	1762.4	7197.8

42. The resettlement of about 500 peasants presents the government of the Western State of Nigeria with a unique opportunity for the introduction of new methods and organisation of agricultural production. The responsibility of the government in this case cannot be deemed to end with the mere release of new land to the squatters. Indeed, the government should not only take charge of the orderly resettlement of the people, but should also try to introduce among the settlers ways and means by which

their productivity, individually and collectively, can be improved. For example, the utilization of the experiences of the 'Kibutzi' system of agricultural production in Israel is one way by which the economic activities of the squatters can be developed. The Faculty of Agriculture of the University of Ife should also be closely associated with the new settlers.

43. In order to be able to discharge this responsibility efficiently, it will be necessary for the government to make a grant of about £50,000 for this project. This grant will cover the cost of clearing and preparing the new land for cultivation, supply of about 1 million economic tree-seedlings (cocoa, coffee, citrus fruits, etc.) as well as allowances for Agricultural Extension work and Research. A wise appropriation of the fund is bound to yield dividends to the government. Such dividends will be in the form of increase in income from sales of Iroko, cocoa and allied trees as logs for timber, as well as increase in taxable incomes of the settlers. Indirect results will be in the form of general improvement in the living condition of the people.

44. It will be necessary to improve the road between Ife and F3 via Aborisade, if the difficulties of resettling the squatters are to be reduced. We travelled the 30 miles distance in a landrover in over two hours. The road is one of the worst in the Western State.

45. It will be necessary for the Ministry of Agriculture to solicit active co-operation of the Ministries of Lands and Housing, Works and Transport, the Faculties of Social Sciences and Agriculture as well as the Department of Geography of the University of Ife for an effective and efficient execution of this project.

46. Acknowledgement:

We are grateful for the generous assistance given to us during the process of this survey by His Highness the Oni of Ife, the Squatters' Association, and their legal adviser, Barrister Peter Ogunleye, the Ife Divisional Agricultural and Forestry offices, the Senior officials of the Ministries of Agriculture and Natural Resources, and Lands and Housing: the Faculty of Agriculture, the Estate Department, the Department of Geography and Professor I.A. Akinjogbin, Head of Department of History, the staff and the students of the Faculty of Social Sciences, University of Ife.

Appendix I

WESTERN NIGERIA NOTICE No. 392

Public Lands Acquisition Law (Cap. 105)

LAND REQUIRED FOR THE SERVICE OF
THE GOVERNMENT OF WESTERN NIGERIA

Notice is hereby given that the following land at Ife in the Ife Division of the Oyo Province, Western Nigeria is required by the Government for public purposes absolutely.

DESCRIPTION

All that parcel of land near Ife in the Ife Division, Oyo Province, Western Nigeria, containing an area of approximately 16,000 acres the boundaries of which are described below:-

Starting at a point A on the north side of the Ife-Ede road and lying approximately 1,320 feet due north-west of the junction of Ife-Ede and Ife-Ibadan roads, the boundaries run first along the north side of the Ife-Ede road in a general north-westerly direction for a distance of 32,750 feet to a point B which lies approximately 1,320 feet from the eastern outskirts of Edunabon Village, thence in straight lines the bearings and lengths of which are as follows:

From	Bearings	Lengths	To
Point B	10° 00'	2,500 feet	Point C
Point C	46° 45'	8,200 feet	Point D
Point D	104° 00'	7,300 feet	Point E
Point E	138° 15'	7,000 feet	Point F
Point F	60° 30'	21,700 feet	Point G
Point G	140° 00'	12,800 feet	Point H

on the north bank of Amuta Stream, thence along the north bank of the same stream in a general south-westerly direction for a distance of 21,000 feet to its confluence with Opa stream, thence along the south bank of Opa stream in a general easterly direction for a distance of 1,000 feet to its confluence with Mokuro stream, thence along the south bank of Mokuro stream in a general south-easterly direction for a distance of 1,000 feet, to a point I thence in a straight line on a bearing of 222° 15' for a distance of 10,600 feet to point A.

(the starting point).

All bearings, distances and lengths are approximate; and

All bearings are referred to True North.

2. Any person claiming to have any right or interest in the said land is required within six weeks from the date of the service of this notice to send to the Commissioner of Lands, c/o Principal Lands Officer, Ministry of Lands and Housing, Western Nigeria, Ibadan, a statement of his right and interest and of the evidence thereof and of any claims in respect of such right or interest.

3. The Government is willing to treat for the acquisition of the said land.

4. Land in respect of which no statement is received is liable to be dealt with as unoccupied land.

5. And notice is hereby given that the Government intends to enter into possession of the said land at the expiration of two weeks from the date of the publication of this notice in the Western Nigeria Gazette.

6. Any person who shall wilfully hinder or obstruct the Government or any person employed by the Government from taking possession of the said land or any part thereof is liable under the provisions of the Law above-mentioned, on conviction to a fine of twenty-five pounds or to imprisonment for three months.

7. A plan showing the site is available for inspection during office hours at the office of the Principal Land Officer, Ministry of Lands and Housing, Ibadan.

8. In virtue of the provisions of the Law and subject thereto no claim to any estate, interest or right in the land affected by the notice made after the expiration of twelve months from the publication of this notice in the Western Nigeria Gazette will be entertained by any public officer whose duty it is to receive such claims or by any Court.

DATED the 13th day of March, 1961.

N. O. A. AKINYEMI,
Permanent Secretary,
Ministry of Land and Housing,
Western Nigeria

GPI 630/361/400

MINISTRY OF LANDS AND HOUSING
IBADAN. WESTERN NIGERIA.

6th Feb., 1967.

Our Ref. No. LS. 523/T/145.

The Senior Secretary to the
Administrator,
Ife Divisional Council,
Ife.

Acquisition of Land for the University
of Ife.

I am directed to refer to your letter No. 686/209 of 18th April, 1966 and to inform you that arrangements are being made to pay compensation for crops to the landowners affected by the acquisition.

2. I should be grateful therefore, if you would inform all landowners/farmers within the acquisition that they should no longer harvest the crops on the land as all estate and interests in the land have now passed to the government.

(Sgd.) T. O. Folami,
for Permanent Secretary,
Lands Division.

No. 686/248A.

Ife: 8 February, 1967.

Copy to :-

All Land-owners/Farmers,
University of Ife Site,
Ile-Ife.

Above is for your information and necessary action, please, with reference to paragraph 2 above.

/Joe.

(Sgd.) f: Senior Secretary to the
Administrator,
Ife Divisional Council.

APPENDIX ~~5~~ 1 (b)

C/R/109/10/91

H.J. Balmond, B.A.

SECRET

22nd Nov., 1966

The Permanent Secretary,
Ministry of Land & Housing,
Secretariat, Ibadan.

Dear Sir,

Land Acquisition and Crop Compensation
University site at Ife

May I refer to the minutes of the meeting attended by representatives of interested Ministries and this University held in the office of Chief Dina on 8th July, 1966 on the above named subject.

One of the important decisions of that meeting was that your Ministry should be fully responsible for all matters connected with crop compensation, while the Ministry of Agriculture and Natural Resources would assist with the technical details of crop enumeration.

A second vital decision was that you should "convey at an early date a meeting of the land-owners and inform them that Government had agreed to pay them compensation every other month.....": this was aimed at re-assuring the farmers that the matter was receiving active attention by Government and so preventing them from reinstituting court action against the Government over the matter. It was also decided that you should approach the Finance Department of the Treasury for necessary funds to meet payment of crop compensation.

We have not heard from you regarding further development. I should be grateful to be kept informed of the progress already made to implement these decisions. We are extremely worried about the situation as the University is definitely moving to the new site in January, 1967, and it is most desirable for us in order to ensure orderly planning that the University secures and enjoys an unfettered ownership over the land, free from any intrusion or trespass whatsoever.

Yours faithfully,

Sgd. H.J. Balmond,
Registrar

cc: Chief I.O. Delano,

For information please.

Land acquisition and crop compensation:
University site at Ife.

I am directed to acknowledge receipt of your letter No. C/R/109/10/92 of 22nd November, 1966 and to inform you with regret that the Chief Conservator of Forests of this Ministry has in a letter of 8th November, 1966 addressed to the Principal Land Officer Ministry of Lands and Housing, Ibadan, reported that no suitable alternative land can be found for the re-settlement of land-owners being displaced by the acquisition of land for your Ife Campus.

2. In the circumstances you may wish to get in touch with the Permanent Secretary, Ministry of Lands and Housing and the Permanent Secretary Ministry of Finance for any further action that may be considered desirable.

Sgd. ?

Acquisition of land for the University of
Ife

I am directed to acknowledge the receipt of your letter No. C/R/109/10/91 of 22nd November, 1966, and to confirm that it was decided at the meeting held on 8th July, 1966 that this Ministry should be responsible for all matters connected with crop compensation, whilst the Ministry of Agriculture and Natural Resources would assist with the technical details of crop enumeration.

2. The Local Government Adviser and Sole Administrator in charge of Ijesha/Ife Divisions had convened a meeting with the representatives of the land-owners on the basis of the decisions reached at the meeting held on 8th July, 1966. I am already taking steps to seek approval for the provision of funds for paying the balance of crop compensation.

3. Representatives of the land-owners have called at this Ministry since the meeting of 8th July, 1966, and they have been informed of the efforts being made to pay the balance of the crop compensation as well as provide alternative land for resettlement. They appear satisfied with the arrangements. I agree, however, that these efforts should be intensified so that the land-owners might enjoy the concrete results without further delay.

Sgd. (S.O. OYEDIRAN),
for Ag. Permanent Secretary.

The Sole-Administrator i/c
Ife-Ilesha Divisions,
Divisional Office,
Ife-Ife.

Sir,

The University of Ife wants to start developing its teaching farm any time from now. All the economic crops on the farm site have been enumerated, all the calculations for payment of compensation have been made and the actual payment of compensation is now being considered by the Western Nigeria Government.

I should be grateful if you would arrange to instruct all the farmers and the villagers on the University farm site (Lot six) to vacate the area within seven days. The particulars connected with the acquisition of the area are contained in the Western Nigeria Notice No. 351 published in the Western Nigeria Gazette No. 17, Vol. 14 of 8th April, 1965.

Thanking you in advance for your early attention.

Yours faithfully,

(Sgd) H. J. Balmond

APPENDIX 5

Minutes of a Meeting held between the Department of Economics Representatives and His Royal Highness the Oni of Ife at the Palace, Ile-Ife on the 29th November, 1967

1. Present: Oba Aderemi, Oni of Ife
Professor S.A. Aluko, Head of Department of Economics
Dr. Vanden Driesen
Dr. O.A. Oguntoye
2. Professor Aluko thanked the Oni for the time spared in meeting the representatives of the Department who were then introduced to the Oni. He mentioned that the purpose of the meeting was to find out from His Highness the best approach to the squatters on the University land, as it is the intention of the University to assist in resettling these people on a new land.
3. The Oni expressed thanks and joy that the University Authorities are taking interest in the fate of these people. The people, he maintained, are the owners of the land. The land on which the University was built was owned by three families: Olubashe, Akui and Orunto families. These families had given the land to the present occupants. The Oni said that the people are ready to move, but the problem is to where they should move. There are 6 open Government Forest Reserve areas in Ife (F1, 2, 3, 4, 5 and 6), but Fs 1, 2, 4, and 5, i.e. 4 areas, are now fully occupied, leaving only F3 and F6 free for new settlement.

F3 is about 53 sq. miles and is between 30 and 40 miles away from Ife.
F6 is about 123 sq. miles and is much further away from Ife than F3.

The Ministry of Agriculture had written asking whether the Oni will agree that part of F3 be used in resettling the people. The Oni said that he has written the Ministry giving his approval and consent. He, however, thought that somebody in the Forestry Section of the Ministry is trying to object, and as such it might be necessary to get out an order from the highest body, probably the Military Governor, requesting that part of Forest Reserve F3 be used for the resettlement. Once the land is available, the Oni maintained, the people will move.

4. Professor Aluko thanked the Oni and assured him that the University authorities will take the matter up with the Ministry and with the Military Governor.

He further informed the Oni that once the problem of land is settled, we might still have to get in touch with the people so as to be able to help them settle in their new houses. It was also decided that we should meet the Oni from time to time and also the heads of the three families concerned.

5. The meeting which started at about 10.45 a.m. ended at about 11.50 a.m.

O.A. Oguntoye

Survey of Squatters on University of Ife Land

I forward herewith a copy of a Report on a Survey conducted by the Department of Economics of the University of Ife on the squatters on University Land at the Ile-Ife Campus.

2. His Excellency the Military Governor has directed that a Committee, to be presided over by the State Commissioner for Lands & Housing, should consider the issues raised in the Report. Other Members of the Committee are the Commissioner for Education, the Attorney-General, the Permanent Secretary, (Political & Administration), the Permanent Secretary, Ministry of Finance, the Permanent Secretary, Ministry of Education, the Permanent Secretary, Ministry of Agriculture & Natural Resources, the Permanent Secretary, Ministry of Lands & Housing and 5 representatives of the University of Ife; viz, the Chairman of the Provisional Council (Chief T. T. Solaru), the Vice Chancellor (Professor H. A. Oluwasanmi), the Dean of the Faculty of Social Sciences (Professor S. A. Aluko), Mr. Owolabi Kolawole and Dr. A. A. Adegbola.

3. His Excellency will expect a Report from the Chairman of this Committee after the completion of the Committee's work.

4. Only two copies of the University's Survey Report were forwarded to this Office and I have written to ask for 10 more copies. On the receipt of these, it will be possible to make a copy each available to the non-University Members of the Committee.

5. Copies of this letter go to the Attorney-General, and the other four Permanent Secretaries mentioned in paragraph 2 above, for their information at this stage.

Dear Sir,

Survey of Squatters on University of Ife Land

I am directed to acknowledge the receipt of your letter CS. 3/422 dated 10th March, 1969 and to inform you that His Excellency the Military Governor has approved the setting up of a Committee, to be presided over by the Commissioner for Lands & Housing, which will examine the issues raised in the Report on the above-mentioned subject. Other persons nominated to serve (with the five University representatives) on the Committee are the Commissioner for Education, the State's Attorney-General, the Permanent Secretary, (Political & Administration) in this Office, the Permanent Secretary, Ministry of Finance, the Permanent Secretary, Ministry of Education, the Permanent Secretary, Ministry of Agriculture and Natural Resources and the Permanent Secretary, Ministry of Lands & Housing.

2. I should be grateful if you would let us have, early, 10 more copies of the Report so that each official Member of the Committee can be given one. It will not be possible to arrange the first meeting of the Committee until we have received the extra copies requested.

Yours sincerely,

Your Ref. No.....
Further communications on this
subject should be addressed to the
Permanent Secretary quiting

Our Ref. No. LS...523/E/79..

Date...14th January, 1970.

The Secretary to the Military
Government and Head of Service,
Office of the Military Governor,
Ibadan.

Survey of Squatters on University of Ife Land

With reference to your letter No. SP/S.194/76 of 17th March, 1969, I forward herewith two copies of the Report of the Committee appointed by His Excellency the Military Governor to consider the issues raised in the Report prepared by the University of Ife on the Survey of Squatters on the University land.

2. The Commissioner for Education, the Permanent Secretary, Ministry of Education, the Chairman of the Provincial Council (Chief T. T. Solaru) and Mr. Owolabi Kolawole could not attend the meeting of the Committee. The Permanent Secretary, Ministry of Agriculture and Natural Resources, the Attorney General and the Permanent Secretary, Ministry of Finance sent representatives. All the other members personally attended the meeting and, together with the representatives of the three last-named members fully subscribed to the recommendations of the Committee.

3. The delay in submitting this Report was due to the fact that it took an inconceivably long time to get the Report confirmed and signed by the members. A few members denied receiving copies of the Report forwarded to them as far back as September 1969 and when they eventually confirmed the Report as a correct record of the proceedings of the meeting, it was a problem getting some of them to sign it. In order to avoid further delay I despatched an officer to Ife early this month personally to obtain the signatures of the University members. Even then, Prof. Oluwasanmi and Dr. Adegbola were not available and Prof. Aluko had to sign on behalf of himself and the other University members. I confirm however that both Prof. Oluwasanmi and Dr. Adegbola had earlier signified in writing their agreement with the Report.

4. The Report is commended for His Excellency's approval. Meanwhile, I have succeeded, not without some pressure, in obtaining from the Ministry of Agriculture and Natural Resources details of enumeration data in respect of economic crops for which compensation is claimed by the tenants on the site and I propose to resume compensation payments immediately His Excellency's approval of the recommendations in the Report is received.

(B. A. ODUNTAN),
Permanent Secretary,
Ministry of Lands and Housing.

89

Report of a Committee set up to Examine the Survey
Report on Squatters on the University of Ife Land

The Committee which was set up by His Excellency the Military Governor to consider the issues raised in the report by the Department of Economics of the University of Ife on Squatters on the University land met in the office of the Commissioner for Lands and Housing at Ibadan on Tuesday 5th August, 1969.

Present at the meeting were:

Chief Bisi Onabanjo	-	Commissioner for Lands and Housing (Chairman)
Chief N. O. A. Akinyemi	-	Permanent Secretary (Political and Administration) Office of the Military Governor
Mr. B. A. Oduntan	-	Ag. Permanent Secretary, Ministry of Lands & Housing
Mr. M. S. Adigun	-	representing Ministry of Agric. & Natural Resources
Mr. Ajomale	-	representing Attorney General
Mr. Aromolaran	-	representing Permanent Secretary, Ministry of Finance
Professor H. A. Oluwasanmi	}	representing University of Ife.
Professor S. A. Aluko		
Dr. A. A. Adegbola		

ABSENT

Dr. Omololu Olunloyo	-	Commissioner for Education
Dr. A. M. Fagbulu	-	Ag. Permanent Secretary, Ministry of Education
Chief T. T. Solaru	}	University of Ife
Mr. Owolabi Kolawole		

In Attendance

Chief S. O. Oyediran	-	Chief Land Officer
Mr. F. A. Teriba	-	Assistant Agricultural Extension Services Officer

2. The Committee reviewed matters relating to the acquisition of Land for the University of Ife and noted that a Certificate of Title had been obtained by Government in 1965 over the land which is about 13,852 acres in extent and which is now State land. The main problem was that although the land had been acquired by the Government since 1960, the farmers were still very largely in residence on the acquisition and had refused to move out in spite of repeated requests by both the University authorities

and the Inspector/Divisional Officer, Ife Division. The Committee therefore turned its attention to two issues, raised in the report, which if satisfactorily resolved would ensure the peaceful move of the squatters from the University site.

These are:

- (i) delay in payment of compensation for crops;
- (ii) the provision of alternative land for the landowners and the resettlement of the displaced tenants.

Payment of Compensation

3. The Committee observed that the Ministry of Agriculture and Natural Resources handled the payment of compensation for crops up to 1966 when it was decided that the Ministry of Lands and Housing should take over the payment. It was also observed that the claimants were divided into Lots 1-9 and that the Ministry of Agriculture and Natural Resources had paid for Lots 1-4.

4. The Committee also examined the list of claimants in Lots 5-9 which was compiled from information obtained from the Ministry of Agriculture and Natural Resources and which apparently followed the enumeration lists, unrelated to particular parcels of land within the acquisition. Payment of compensation on this basis was diffused throughout the whole acquisition and consequently those who had received their crop compensation within a given parcel of land refused to move out until their colleagues within the same parcel of land who had not been paid were ready to move. In order to facilitate payment, claimants in Lots 5-9 had been re-arranged by the Ministry of Lands and Housing to show the tenants under each landlord claiming ownership of the land. It was hoped that this will make it possible for each parcel to be cleared of all squatters and for the University to move in as soon as the tenants shown on the list have been paid their crop compensation.

5. It was noted that title clearance by the Ministry of Justice was under way and was likely to be completed soon. The main cause of delay in payment of crop compensation had been the absence of enumeration data showing details of economic crops found by the enumerators on the area claimed by each tenant and the compensation rate applicable to each type of crop depending upon whether the farm is in a good, fair or poor condition. The Committee then decided, and the representative of the Ministry of Agriculture and Natural Resources on the Committee agreed, that the

Ministry of Agriculture and Natural Resources should furnish the required data to the Ministry of Lands and Housing within two weeks to enable crop compensation payment to be resumed.

6. The Committee gave consideration to the desirability of paying the crop claimants all at once so that they could move out of the University land to the new site at the same time. It would however be some time before the new site was fully exploited by the concessionnaires and ready for occupation by the tenants and as further delay in payment might spark off violent reactions from the tenants, it was agreed that payment of compensation should be resumed immediately the additional data required by the Ministry of Lands and Housing were furnished by the Ministry of Agriculture and Natural Resources and that efforts should be made to complete payment before the claimants move to the new settlement in order to afford them an equal opportunity of selecting their holding on the new site. It would also facilitate the implementation of a resettlement programme which the Government might wish to introduce for the benefit of the settlers.

Compensation for Building

7. It was brought to the notice of the Committee that a number of building had sprung up on the site since the acquisition. It was agreed that only the buildings on the site on the date of acquisition would qualify for compensation. Buildings erected after the acquisition date would not, according to the Public Lands Acquisition Law, attract compensation.

Provision of Alternative Land

8. ~~Three~~ alternative ways of resettling the displaced persons, numbering about 4,000, were suggested in the report, namely:

- (i) distribution of the land among the 16 land-owing families in proportion to the size of land previously owned by them in the University campus. (The Report points to a danger that the family might refuse to allocate land to some or all of the squatters. Secondly, members of the land-owing families who did not farm on the University site might now demand plots on the new site).
- (ii) Distribution of the land among the squatters in proportion to their present holdings without unnecessary interference with the existing relationship between the tenants and their land-owners.

The land-owners correctly pointed out that this procedure will penalise previous occupants who had voluntarily obeyed the Government instruction and left the University land or have been forced to quit the already developed part of the University land;

(iii) the third possible alternative is for the Government to re-lease a maximum of 12 sq. miles, i.e., about 8,000 acres of land out of which 6,000 acres can be used for resettling the squatters and the remaining 2,000 acres allocated to the land-owning families.

9. Although the Report favoured alternative (i) above, the Committee did not find itself able to support any of the proposals. It was observed that the land was acquired under the Public Lands Acquisition Law and since the agreement originally reached with the Ife Divisional Council was to provide alternative land for the landowners in lieu of cash compensation, to which they would have been entitled under the Law, it was only reasonable that the alternative land provided should be given to those who had registered their claims under the Law. The Claims Plan showed 66 claimants covering a total of 11,327.32 acres, the balance of 2,254.68 acres within the acquisition being unclaimed. The Committee was also informed, that the Ministry of Agriculture and Natural Resources had taken a firm decision to de-reserve a portion of area F3 in the Ife Forest Reserve for the purpose of providing an area of 11,600 acres for allocation to the landowners plus 100 acres for the provision of roads, open spaces and community centres.

10. After the Committee had examined the implications of the various proposals, it decided to recommend that the land be distributed to the land-owners who registered their claims with the Ministry of Lands and Housing and whose titles to the parcels claimed were properly established. In doing so, the landlords should be requested, by way of an appeal, to take back their old tenants on the new site so that the old landlords/tenant relationship might continue. It was however suspected that the landlords if given the new reserve with the economic trees therein might refuse to take on the tenants and prefer instead to operate the forest reserve which was capable of yielding substantial income to the landlords. The Committee therefore recommended that the Ministry of Agriculture and Natural Resources should arrange the exploitation of the de-reserved area as quickly as

possible so that the landlords would have the land stripped of its economic trees. On this basis, the landlords, most of whom are absentee-owners, ^{have} tenants-farmers from whom they derive substantial income by way of 'isakole'.

11. Resettlement of Tenant/farmers

The Committee agreed that the Government has a social responsibility for resettling the farmers who together with their wives and children number over 4,000. It would be unfortunate if they are allowed to return to their old method of farming on arriving on the new settlement or if the opportunity is not seized to introduce measures for improving their standard of living. The Committee therefore agreed to recommend that a machinery should be set up for the resettlement of the farmers on the new site with a view to evolving a better farming system and creating a modern rural society in the area. It was suggested that the Ministry of Agriculture and Natural Resources, the Ministry of Lands and Housing, the Ministry of Economic Planning and Social Development and other interested agencies should jointly sponsor and, subject to Government approval, implement a resettlement scheme for the displaced farmers. It would of course advance the cause of the scheme if when paying crop and building compensations to the farmers, they are clearly informed of the proposed resettlement scheme so that they could as far as possible apply the amounts received in providing houses for themselves and their families and for the establishment of new farms in the new area instead of squandering the compensation received on unprofitable ventures.

Summary

12. Finally, the Committee agreed to recommend:

- (i) that the Ministry of Lands and Housing should resume payment of crop and building compensations without delay;
- (ii) that all the tenants should move at a pre-determined date to the new site, such date to be previously agreed by the University Authorities with the tenants but not to be before the time that the new site is ready for occupation;
- (iii) that the Ministry of Agriculture and Natural Resources should arrange a systematic exploitation of the de-reserved area to ensure that the site is ready for occupation by the tenants at the earliest possible time.

- (iv) that in paying compensations to the settlers, they be informed of the resettlement programme on the new site so that they could, if they so desire, conserve their earnings to resettle themselves and their families in their new surroundings;
- (v) that the new site should be distributed to the landlords whose claims to parcel of land on the old site were properly registered with the Ministry of Lands and Housing and whose titles are properly established in the usual manner;
- (vi) that the Ministry of Agriculture and Natural Resources, the Ministry of Lands and Housing, the Ministry of Economic Planning and Social Development and any other Government agency concerned should jointly sponsor and, subject to Government approval, implement a resettlement scheme for the displaced tenants partly in the discharge of Government's social responsibility to these tenants and partly as a means of introducing modern system of farming and improved standard of living into the new community.

pp. 88-94 sub'd

95

S. M. G. & H. S.,

Pages 88 - 94 contain the results of the efforts made by a Committee, comprising Govt. Officials and representatives of the University of Ife, to solve the problems created by the acquisition of the site of the University.

2. When Govt. acquired the land in 1960, it agreed to pay compensation for economic tree crops already planted on the land; and undertook to provide alternative land for the resettlement of the displaced land owners and tenants. About 64% of those occupying the acquired area of land have since vacated it; but the remainder have stayed on as squatters refusing to move because they have not been paid compensation for their crops and have not also been provided alternative land for resettling.

3. It is understood that the main cause of the delay in payment of crop compensation had been the absence of enumeration data showing the details of economic crops found by the enumerators on the area claimed by each tenant, and the compensation rate applicable to each type of crop. The provision of alternative land had been delayed because it had not been decided how best to apportion the land as between the land-owners and the tenant-farmers.

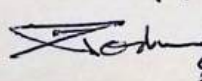

4. The Dept. of Economics of the University of Ife recently conducted a survey on the Squatters on the University land, and its Report (copy on p 73) formed the basis of the study of the Committee mentioned in para 1 above.

5. A summary of the recommendations of the Committee is set out in para. 12 of the Report on pp 93 - 94. H. E. M. G. is to be requested to approve these recommendations; after which you may wish to direct that follow-up action be taken by the Ministries of Lands & Housing, Agriculture and Natural Resources and Finance.

Sir,

Report of the Committee set up to examine the
Survey Report on Squatters on the University
of Ife Land

At their meeting held on Friday, 9 October, 1970, the Council of this University constituted under the University of Ife Edict, 1970, noted the efforts so far made by the Provisional Council and the Government Ministries concerned in resolving the problems resulting from the acquisition by the State Government of the land on which University is sited at Ile-Ife.

The Council, however, directed that a request be made to the Ministries concerned for expediting action on the recommendations in the reports of the meetings held by Government officials and representatives of the University concerning squatters on the University land.

I should therefore be grateful for your cooperation in the matter.

Yours faithfully,

HJ

Sir,

Report of the Committee set up to Examine
the Survey Report on Squatters on the
University of Ife Land

I write to inform you that at their meeting held on Saturday, 23 January, 1971 the Council of this University noted the efforts so far made by the Ministries concerned in resolving the problems posed by squatters on the land acquired by the Government for the University at Ile-Ife.

The Council however directed that a request be made to the Military Government, Western State for assistance in expediting action on the recommendations in the reports of the meetings held by Government officials and representatives of the University on the matter.

I should be grateful if you could let me know whether a delegation from the University should wait on His Excellency, the Military Governor on this matter, and if so, when.

Yours faithfully,

(H.J. Balmond)

Registrar and Secretary to the Council.

Report of the Onabanjo Committee on
Squatters on University of Ife Land

The Council of the University of Ife has requested that His Excellency the Military Governor should receive a delegation from the University in order to obtain the assistance of His Excellency in getting the Government Ministries concerned to expedite action on the implementation of the recommendations in the Report of the above-mentioned Committee. To avoid giving the impression that such a move as proposed by the University is necessary in order to prompt Ministries to take necessary action, His Excellency has politely turned down the request of the University's Council; but he has given assurance that he will look into the matter to find out what has been holding up action.

I am directed to draw attention to the fact that it was about a year ago that I informed the Permanent Secretary Ministry of Lands and Housing (in my letter No.SP/S.194/96 of 19th February, 1970, which was endorsed to the Permanent Secretaries to the other two Ministries concerned - Finance and Agriculture and Natural Resources) that His Excellency had directed that appropriate follow-up action be taken on the recommendations in the Report. I am to request that you should submit urgently for His Excellency's information, a report on what has been holding up necessary action.

Report of the Onabanjo Committee on Squatters
on University of Ife Land

I wish to acknowledge receipt of your letter No. SP/S.194/103
dated 1st February, 1971, and to apologise for the long delay in
completing action on the above-mentioned subject.

2. The position is as follows: Following the Executive Council
Conclusion on the matter, an area of 11,597 acres was located on the
map and has since been demarcated in Ife (F.3) Forest Reserve. At a
meeting held in the Ministry of Lands and Housing in July, 1970, at
which were present representatives of this Ministry and of the University
of Ife, it was agreed that the area should be converted into a
resettlement scheme and that the Extension Services Division of this
Ministry should take over the implementation of the agreement and
convene future meetings. Unfortunately, the Extension Services Division
did not convene the meeting concerned until 16th December, 1970, the
minutes of which only got to the office on 4th February, 1971 (I will
be dealing with the appropriate officers on this issue).

3. The most urgent operation before the site can be used for
farming is the exploitation of the economic trees on the land and I
am getting the Forestry Division to take action on this without any
further delay. While action is being taken on this, the committee
will report on their findings during the visit to the site to the
University of Ife authorities.

4. I will report further progress to you from time to time.

(M. A. Akintomide)
Permanent Secretary.

Report of the Onabanjo Committee on
Squatters on University of Ife Lands

With reference to your letter No. SP/S.194/103 of 1st February, 1971, appropriate follow-up action had been taken and is being taken on the Report of the Onabanjo's Committee on Squatters on the University of Ife land. I submit below a Progress Report on the action already taken.

2. Following the receipt of your letter No. SP/S.194/96 of 19th February, 1970, this Ministry invited Officials from the Ministries of Agriculture and Natural Resources, Economic Planning and Social Reconstruction as well as representatives from the University of Ife to meet on 9th July 1970 to consider the follow-up action on the Report. The meeting agreed that in view of the large Agricultural content of the resettlement scheme, the Ministry of Agriculture and Natural Resources should take over the scheme and convene future meetings of the Committee. I attach herewith a copy of the notes of the meeting.

3. By a letter reference LS. 523/E/108 of 15th May, 1970, this Ministry requested the Ministry of Finance to provide a sum of £30,000 for the payment of crop compensation in the acquisition. While the provision was being awaited, the Ife University Charter was promulgated with effect from 11th June 1970. The Ministry of Justice has since advised that the transactions as regards crop compensation came completely off the hands of this Ministry from 11th June 1970. The University of Ife and the Ministry of Finance had been informed of this advice. In effect, the University of Ife will pay whatever compensation remains in the acquisition.

4. The Survey Division in this Ministry is preparing a plan of the resettlement area. As soon as this is ready, the Town Planning Division, also of this Ministry, will prepare a layout of the resettlement area, which will be distributed to the landowners evicted from the original site.

(F. A. O. SHOGA),
Permanent Secretary,
Ministry of Lands & Housing.

107

Notes of the Meeting held at about 12 noon
on Thursday, 9th July, 1970 in the Office
of the Permanent Secretary, Ministry of
Lands and Housing on the Resettlement of
farmers to be evicted from the University
----- of Ife site -----

PRESENT:-

Mr. B.A. Oduntan, Permanent Secretary.	Chairman	} Representing the Ministry of Lands and Housing.
Chief S.O. Oyediran, Chief Land Officer.		
Mr. S.O. Tokun, Chief Town Planning Officer.		
Mr. A.O. Adekunle, Conservator of Forests.		} Representing the Ministry of Agriculture and Natural Resources.
Mr. E.O. Okediran, Assist. Chief Agricultural Extension Services Officer.		
Mr. B.T. Akinwale, Chief Social Development Officer		} Representing the Ministry of Economic Planning and Reconstruction.
Mr. S.F. Aboderin Senior Social Development Officer		
Prof. S.A. Aluko, Professor of Economics		} Representing the University of Ife.
Dr. O.A. Oguntoye, Lecturer in Economics.		

In opening the meeting, the Chairman recalled that although the land of the University of Ife was acquired about ten years ago, the occupiers refused to move out as compensation had not been paid in full for crops and also because alternative land had not been provided as originally agreed. He then referred to the investigations carried out and the subsequent report prepared on the squatters by the University of Ife. He read the summary of the recommendations at paragraph 12 of the Report and narrated the action so far taken on the recommendations.

2. Continuing, the Chairman referred to the recommendation under paragraph 12(vi) of the Report namely:

"that the Ministry of Agriculture and Natural
Resources, the Ministry of Lands and Housing, the

Ministry of Economic Planning and Social Welfare
(now Ministry of Econ. Plann. & Reconstruction)
and any other Government agency concerned should jointly
sponsor and, subject to Government approval,
implement a resettlement scheme for the
displaced tenants partly in the discharge of
Government's social responsibility to these
tenants and partly as a means of introducing
modern system of farming and improved standard
of living into the new community."

3. During the discussions which followed, it was reported that the proposed resettlement area was within the Ife farming area, and that it was of a better agricultural quality than the University of Ife land. It was also disclosed that the site was located about 20 miles off the main road and that the approach road was very rugged and hardly motorable.
4. Doubts were expressed as to whether all the present occupiers would like to move to the resettlement area. The meeting, however, re-affirmed a view held in the Report that payment of compensation should be appropriately timed to enable those who wish to move to the resettlement area to conserve their earnings to resettle themselves and families in their new surroundings.
5. It was reported that the demarcation of the resettlement area had been completed and that the Ministry of Agriculture and Natural Resources would soon forward the perimeter survey plan to the Ministry of Lands and Housing. The Ministry of Agriculture and Natural Resources had also invited tenders for felling the timber on the land and it was estimated that the clearing would be completed in about three months. The period required to prepare the layout could not yet be ascertained. It was agreed that representatives of the Ministry of Works and Transport should be invited to the next meeting.

6. In order that Government might be able to give good titles on plots in the resettlement area to the settlers, it was appreciated that the resettlement area should be acquired under the Public Lands Acquisition Law. The resettlement area being a Local Government Reserve, opinions varied as to whether or not Government would be liable to pay compensation for the land to the original owners. It was, therefore, found necessary to seek legal advice on the issue.

7. After a fairly extensive exchange of views, it was agreed that in view of large agricultural content of the scheme, the Ministry of Agriculture and Natural Resources should take over the proposed resettlement scheme and convene future meetings.

You last saw this file at p.101 where it was agreed that H.E. should not receive a delegation from the Council of the University of Ife on the question of the implementation of the Onabanjo Report on how to solve the problems created by the continued presence of squatters on land acquired by Government for the University. We asked, instead, (in the letter on p.103) that the Ministries concerned should report on what had been holding up the required action.

2. Action had been required in two directions. In the first place, there was compensation to be paid for the crops destroyed on the land acquired by Government. Secondly, Government was committed not only to providing an alternative site for the displaced farmers, but also to ensuring that the site provided is cleared and made ready for occupation.

3. From the reports we have now received from the three Ministries, one gathers that

(i) action in respect of paying compensation for crops was stopped when the Ministry of Justice advised the Ministry of Lands and Housing (vide statements made in letter on p.105 and in para.3 of p.106) that with the promulgation of the Charter of the University of Ife (in June 1970) the University assumed responsibility for making the payments. P.S.M.L. & H. claims that the University Authorities have been informed of this advice.

(ii) responsibility for the delay in implementing the decision to re-settle the displaced farmers on a new site, has to be shared between the Ministry of Lands and Housing and the Ministry of Agriculture and Natural Resources. Following the receipt of our letter dated 19th February, 1970 it took the Ministry of Lands and Housing over four months to call (on 9th July, 1970) the first meeting at which necessary follow-up action was to be started. At that meeting, it was agreed that the Ministry of Agriculture and Natural Resources

should take over the implementation of decisions and convene future meetings of interested Ministries.

The next step was not taken however until December, 1970, a matter of some further six months' delay.

4. P.S.M.A. N.R. apologised in his letter p.104 for the delay caused by his Ministry and promised to ensure that as from now on, prompt action will be taken on outstanding matters. P.S.M.L. & H. on the other hand is apparently not convinced that there has been any delay at all. The opening paragraph of his letter p.106 announced that "appropriate follow-up action had been taken and is being taken"

5. I respectfully recommend that further action be taken by this office as in the draft letters (to the Registrar of Unife, P.S.M.A. & N.R. and P.S.M.L. & H.) at back cover which are submitted for vetting, please.

Mr. M. A. Akintomide,
Permanent Secretary,
Ministry of Agriculture and
Natural Resources,
Ibadan.

Report of the Onabanjo Committee on Squatters
on University of Ife land

P.104
Thank you for your letter No. WPC.88/579 of 10th February, 1971, I have noted the assurance you gave that urgent action will be taken as from now to implement the recommendations for resettling the displaced farmers on the University land. As your Ministry now has responsibility for co-ordinating the work of the committee of officials handling the matter, I shall be glad if you will brief the Registrar of the University at regular intervals on the progress being made in clearing the resettlement area, surveying it and preparing a layout of the site.

(P. T. Odumosu),
Secretary to the Military Government and
Head of Service.

SP/3.194/113

4 March, 1971.

Mr. F. A. O. Shoga,
Permanent Secretary,
Ministry of Lands and Housing,
Ibadan.

Report of the Onabanjo Committee on
Squatters on University of Ife land

P-106
It was apparent from reading your letter No. LS.523/E/165 of 18th February, 1971 that, unlike other Heads of Ministries concerned with this assignment, you are not convinced that there has been any delay in taking action to implement the recommendations contained in the above-mentioned Report, even though your Ministry contributed to this delay by allowing over four months to elapse before calling (in July 1970) the first meeting of officials at which follow-up action on the Report was to be considered.

2. Will you please note that I shall expect, at monthly intervals, reports on the progress being made by your Ministry in preparing a survey plan of the resettlement area as well as a layout of the site. A copy of each of these reports should be made available to the Permanent Secretary, Ministry of Agriculture and Natural Resources, whose Ministry now has the co-ordinating role in dealing with this matter, and is therefore expected to brief the University authorities.

(P. T. Odumosu),
Secretary to the Military Government &
Head of Service.

The Registrar and Secretary to
the Council,
University of Ife,
Ile-Ife.

Sir,

Report of the Committee set up to examine the
Survey Report on Squatters on the
University of Ife land

P. 102
Further to my letter No. SP/S.194/102 of 1st February, I have now received reports from the Ministries concerned and they expressed regret for the delay in implementing the recommendations contained in the Report of the above-mentioned Committee.

I understand that the University is already aware of the fact that an area of 11,597 acres has been demarcated in the Ife Forest Reserve for the re-settlement of the displaced farmers. The Ministry of Agriculture and Natural Resources has promised to ensure that an urgent operation is mounted to exploit the economic trees on the demarcated area and thus make it possible to farm the land. The Survey Division of the Ministry of Lands and Housing is now engaged in preparing a plan of the resettlement area, and this operation will be followed by the preparation of a layout to be undertaken by the Town Planning Division of the same Ministry.

Both Ministries have been asked to maintain close liaison with you so that you are kept informed of the progress being made in carrying out these assignments.

Yours faithfully,

(F. B. A. Conde),
for Secretary to the Military Government.

M. G. I. V.

AND HOUSING

ADMINISTRATION AND GENERAL DIVISION

IBADAN · WESTERN STATE OF NIGERIA

Your Ref. No.....
Further communications on this
subject should be addressed to the
Permanent Secretary quoting
Our Ref. No. LS.523/E/183

Date 8th June, 1971

The Secretary to the Military Government
and Head of Service,
Office of the Military Governor,
Ibadan.

Report on the Onabanjo Committee on
Squatters on University of Ife Land

P. 106
I wish to refer to your letter Reference No. SP/S.194/113 of 4th March, 1971, and to report that no appreciable progress has been made since my predecessor's letter Reference No. LS.523/E/165 of 18th February, 1971.

2. The Attorney-General has since advised that the legal liability of the Government to pay compensation for crops owned by persons displaced from the land remains, under the Constitution as well as under the Public Lands Acquisition Law, Cap 105, that of the Government. This Ministry will therefore continue to make arrangements for the payment of compensation on the acquisition. No payment can, however, be made at the moment because the Permanent Secretary, Ministry of Finance, has asked that I should renew my request for the release of funds for the payment of compensation after the formal announcement of the 1971/72 Budget.

3. The perimeter survey of the areas involved which had only recently started is still in progress. I have asked the Surveyor-General to give it priority attention. When the survey plans are out, the Chief Town Planning Officer will start the preparation of a suitable layout for the resettlement area.

4. I should be grateful if you would, in the light of the circumstances of this matter, consider my sending you a bi-monthly instead of a monthly report so that there would be sufficient time for some definite activity to be reported on.

5. A copy of this letter is being sent to the Permanent Secretary, Ministry of Agriculture and Natural Resources, for information.

(J. O. Afolabi),
Permanent Secretary.

Our Ref. No.....

LS.523/E/189

Date 14 June, 1971

The Secretary to the Military Government
and Head of Service,
Office of the Military Governor,
Ibadan.

Acquisition of Land for the University of Ife

His Excellency, the Military Governor, has referred to me the attached petition which I am returning with my comments after making a copy for record purposes in this Ministry.

2. The payment of crop compensation in the acquisition which was progressing satisfactorily was left off at the end of the last financial year and has not been resumed this financial year because the Government's Estimates for the 1971/72 financial year have not yet been approved. I will continue the payment as soon as the Estimates are approved and funds are released to this Ministry by the Ministry of Finance. It is estimated that about 1,830 crop claimants remain to be paid whilst the outstanding crop compensation is estimated at about £187,528.

3. With regard to the Resettlement scheme, an area of 11,597 acres (approximately 20 square miles) in Area F3 of the Ife Forest Reserve has been earmarked for the resettlement of the displaced landowners in the acquisition. When the perimeter survey, which is now in progress, is completed a layout of the land showing how it will be distributed in lots among the displaced landowners will be prepared and then the final resettlement can take place.

4. I suggest that the petitioners be informed of the position as it is and that it be pointed out also to them that it is essential that care be exercised and that the compensation payments should not be carried out hurriedly in order to avoid wrongful payments. Also, in view of the large area involved, the Resettlement scheme will take some time to accomplish. The petitioners should be assured, however, that the two matters are well in hand and that everything will be done to accelerate the operations.

Chief Secretary.

Your Excellency Sir,

Land Acquisition: The University of
Ife Permanent Site

We the undersigned humbly forward this letter to
you to seek an interview with Your Excellency.

We are the Farmers whose crops and land were
compulsorily acquired for the permanent site of the
University of Ife.

In spite of all our Constitutional, lawful and peaceful
approaches made to the Government no noticeable improvement
(no land has been given to us and our compensation for crops
have not been paid in full) had taken place, hence this
Association is seeking interview with your Excellency
and we hope that your Excellency will grant us the favour.

An early reply will be highly appreciated Sir.

Yours faithfully,

Alvin T. O.
SECRETARY

1 June

SP/S 194/121

16 June, 1971

The Secretary,
University of Ife Lands Owners Association,
c/o Mr. P. A. Ogunleye,
56 Aderemi Road,
P. O. Box 154,
Ife - Ife.

Sir,

Land Acquisition: The University of Ife
Permanent Site

P. 120 Please refer to your letter No. IUL.4/9 dated 1st June, 1971,
which was addressed to His Excellency, the Military Governor.

The Ministry of Lands and Housing, Ibadan, which is dealing with both problems in respect of which you are seeking an interview, has explained that the payment of crop compensation had already been begun and was progressing satisfactorily until it was temporarily stopped at the end of the last Government financial year (in March). The Ministry has given assurance that as soon as the Estimates for the current financial year (April 1971 to March 1972) have been approved and funds are released by the State Ministry of Finance, it will resume payment to the remaining claimants. It must be emphasized however that these payments cannot be made hurriedly because it is essential, in the interest of the members of your Association, that payments be made only to the right persons.

On the question of the resettlement of the members of your Association, I am to inform you that an area of approximately 20 square miles in the Ife Forest Reserve has been earmarked for this purpose. Work is already in progress to make a perimeter survey and prepare a lay-out showing how the area will be distributed in lots among the displaced land-owners. Again, I am to explain that in view of the large area involved, the Resettlement scheme will take some time to accomplish, but members of your Association can rest assured that everything will be done to accelerate the operations.

I am Sir,

Your obedient Servant
